

Gpr153 Cas9-KO Strategy

Designer:Fengjuan Wang

Reviewer:Fengjuan Wang

Design Date:2019-12-24

Project Overview

Project Name

Gpr153

Project type

Cas9-KO

Strain background

C57BL/6JGpt

Knockout strategy

This model will use CRISPR/Cas9 technology to edit the *Gpr153* gene. The schematic diagram is as follows:

Technical routes

- The *Gpr153* gene has 4 transcripts. According to the structure of *Gpr153* gene, exon2 of *Gpr153-201*(ENSMUST00000055754.7) transcript is recommended as the knockout region. region. The region contains 430bp coding sec Knock out the region will result in disruption of protein function.
- ➤ In this project we use CRISPR/Cas9 technology to modify *Gpr153* gene. The brief process is as follows: gRNA was transcribed in vitro.Cas9 and gRNA were microinjected into the fertilized eggs of C57BL/6JGpt mice. Fertilized eggs were transplanted to obtain positive F0 mice which were confirmed by PCR and sequencing. A stable F1 generation mouse model was obtained by mating positive F0 generation mice with C57BL/6JGpt mice.

Notice

- ➤ The *Gpr153* gene is located on the Chr4. If the knockout mice are crossed with other mice strains to obtain double gene positive homozygous mouse offspring, please avoid the two genes on the same chromosome.
- This Strategy is designed based on genetic information in existing databases. Due to the complexity of biological processes, all risk of the gene knockout on gene transcription, RNA splicing and protein translation cannot be predicted at the existing technology level.

Gene information (NCBI)

Gpr153 G protein-coupled receptor 153 [Mus musculus (house mouse)]

Gene ID: 100129, updated on 31-Jan-2019

Summary

Official Symbol Gpr153 provided by MGI

Official Full Name G protein-coupled receptor 153 provided by MGI

Primary source MGI:MGI:1916157

See related Ensembl: ENSMUSG00000042804

Gene type protein coding
RefSeq status PROVISIONAL
Organism <u>Mus musculus</u>

Lineage Eukaryota; Metazoa; Chordata; Craniata; Vertebrata; Euteleostomi; Mammalia; Eutheria; Euarchontoglires; Glires; Rodentia; Myomorpha; Muroidea; Muridae;

Murinae; Mus; Mus

Also known as PGR1; Al449320; 1110065N12Rik

Expression Broad expression in ovary adult (RPKM 45.3), mammary gland adult (RPKM 24.8) and 23 other tissues See more

Orthologs human all

Transcript information (Ensembl)

The gene has 4 transcripts, all transcripts are shown below:
