

# *Cckar* Cas9-KO Strategy

**Designer:**

**Jinling Wang**

**Design Date:**

**2019-7-17**

# Project Overview

**Project Name**

*Cckar*

**Project type**

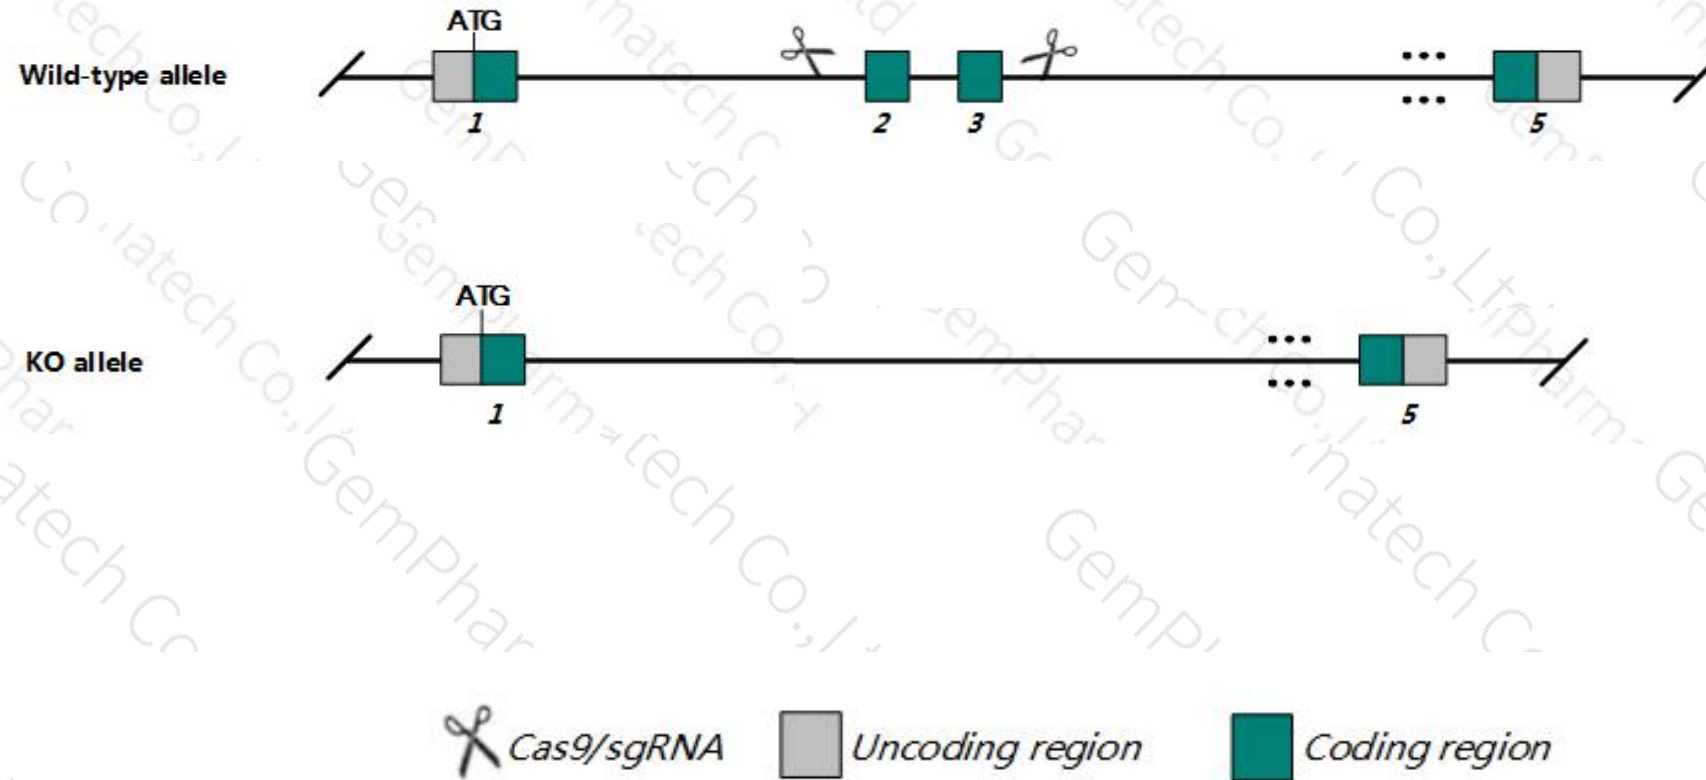

**Cas9-KO**

**Strain background**

**C57BL/6JGpt**

# Knockout strategy

This model will use CRISPR/Cas9 technology to edit the *Cckar* gene. The schematic diagram is as follows:

- The *Cckar* gene has 3 transcripts. According to the structure of *Cckar* gene, exon2-exon3 of *Cckar-201* (ENSMUST00000031093.4) transcript is recommended as the knockout region. The region contains start codon ATG. Knock out the region will result in disruption of protein function.
- In this project we use CRISPR/Cas9 technology to modify *Cckar* gene. The brief process is as follows: CRISPR/Cas9 system

- According to the existing MGI data, Homozygous mutant mice cannot regulate core body temperature in response to changes in ambient temperature.
- The *Cckar* gene is located on the Chr5. If the knockout mice are crossed with other mice strains to obtain double gene positive homozygous mouse offspring, please avoid the two genes on the same chromosome.
- This Strategy is designed based on genetic information in existing databases. Due to the complexity of biological processes, all risk of the gene knockout on gene transcription, RNA splicing and protein translation cannot be predicted at the existing technology level.

# Gene information (NCBI)

## Cckar cholecystokinin A receptor [Mus musculus (house mouse)]

Gene ID: 12425, updated on 2-Apr-2019

### Summary

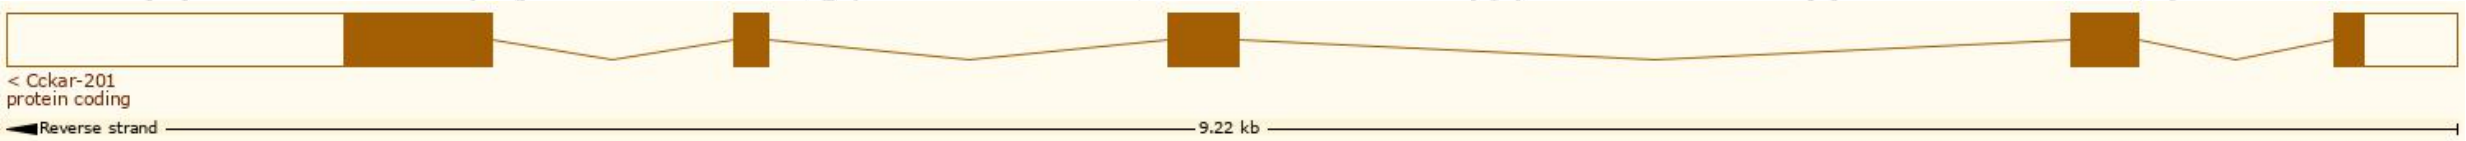

<b>Official Symbol</b>	Cckar provided by <a href="#">MGI</a>
<b>Official Full Name</b>	cholecystokinin A receptor provided by <a href="#">MGI</a>
<b>Primary source</b>	<a href="#">MGI:MGI:99478</a>
<b>See related</b>	<a href="#">Ensembl:ENSMUSG00000029193</a>
<b>Gene type</b>	protein coding
<b>RefSeq status</b>	VALIDATED
<b>Organism</b>	<a href="#">Mus musculus</a>
<b>Lineage</b>	Eukaryota; Metazoa; Chordata; Craniata; Vertebrata; Euteleostomi; Mammalia; Eutheria; Euarchontoglires; Glires; Rodentia; Myomorpha; Muroidea; Muridae; Murinae; Mus; Mus
<b>Also known as</b>	AW106902
<b>Expression</b>	Biased expression in lung adult (RPKM 14.7), kidney adult (RPKM 12.1) and 4 other tissues <a href="#">See more</a>
<b>Orthologs</b>	<a href="#">human</a> <a href="#">all</a>

# Transcript information (Ensembl)

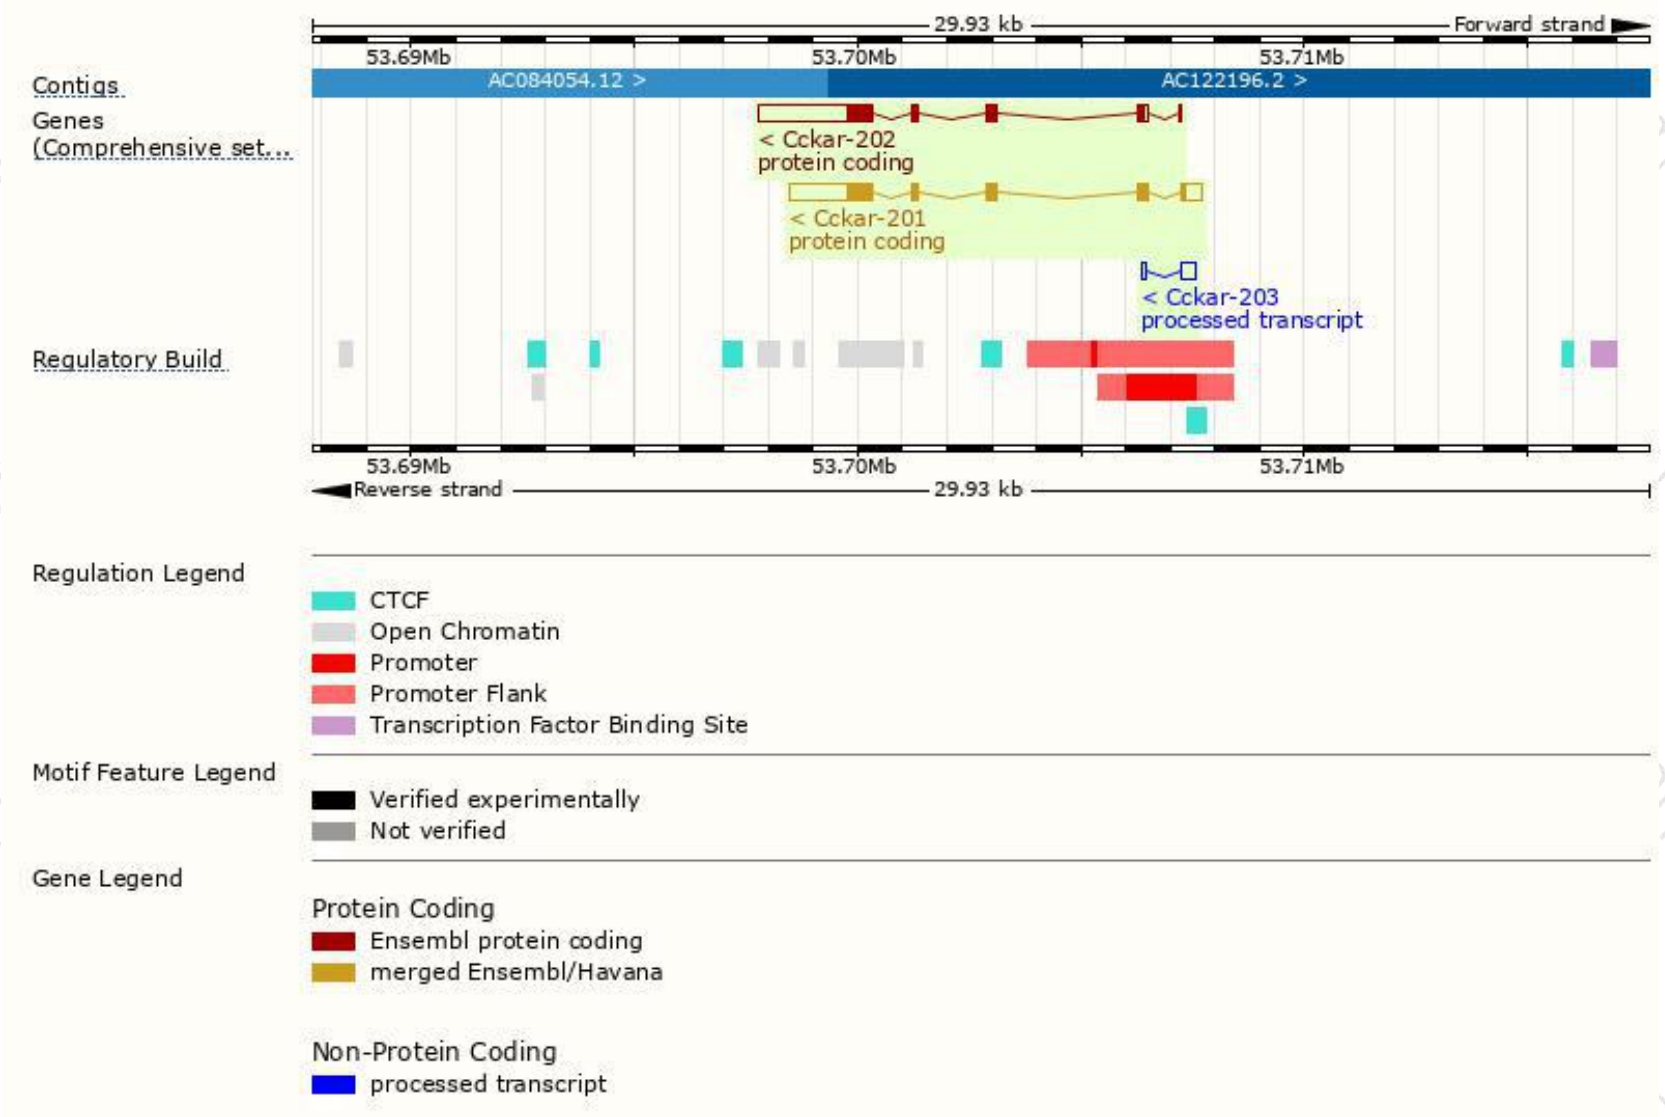

The gene has 3 transcripts,all transcripts are shown below:

Name	Transcript ID	bp	Protein	Biotype	CCDS	UniProt	Flags
Cckar-202	<a href="#">ENSMUST00000200691.3</a>	3230	<a href="#">365aa</a>	Protein coding	<a href="#">CCDS84881</a>	<a href="#">Q3TPL0</a>	TSL:1 GENCODE basic
Cckar-201	<a href="#">ENSMUST00000031093.4</a>	2930	<a href="#">436aa</a>	Protein coding	<a href="#">CCDS19293</a>	<a href="#">O08786</a>	TSL:1 GENCODE basic APPRIS P1
Cckar-203	<a href="#">ENSMUST00000202946.1</a>	424	No protein	Processed transcript	-	-	TSL:3

The strategy is based on the design of *Cckar-201* transcript,The transcription is shown below

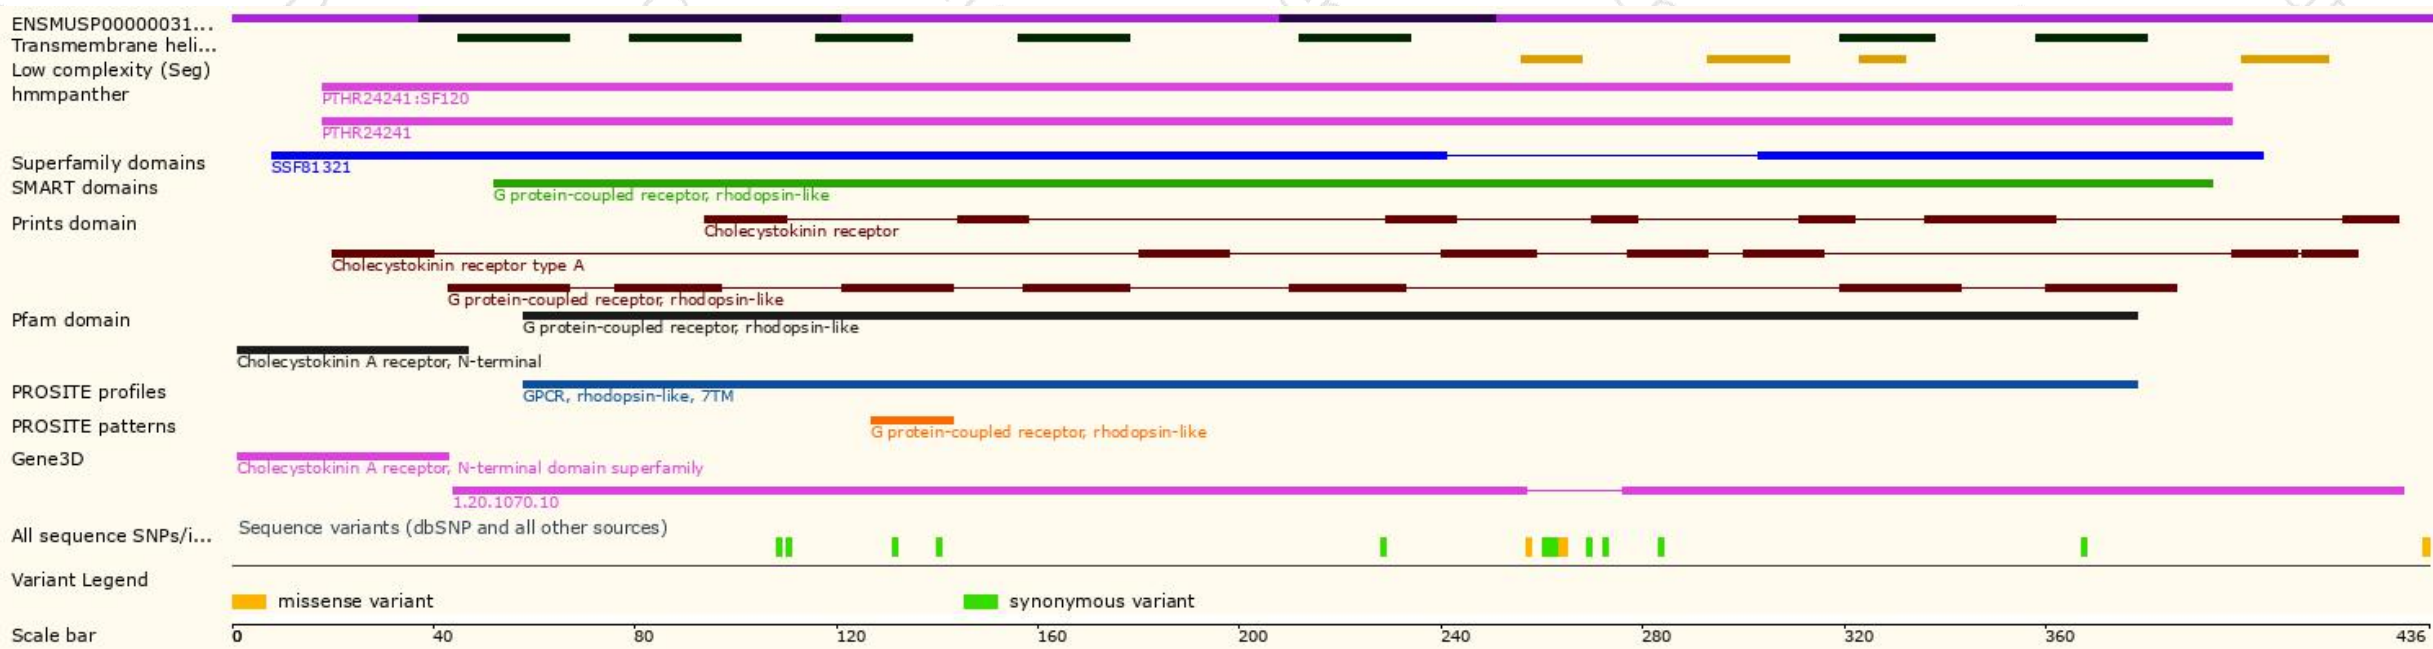

# Genomic location distribution

# Protein domain

# Mouse phenotype description(MGI )

*Phenotypes affected by the gene are marked in blue. Data quoted from MGI database(<http://www.informatics.jax.org/>).*

According to the existing MGI data, Homozygous mutant mice cannot regulate core body temperature in response to changes in ambient temperature.
