

Fadd Cas9-KO Strategy

Designer: Shilei Zhu

Project Overview

Project Name

Fadd

Project type

Cas9-KO

Strain background

C57BL/6JGpt

Knockout strategy

This model will use CRISPR/Cas9 technology to edit the *Fadd* gene. The schematic diagram is as follows:

- The *Fadd* gene has 1 transcript. According to the structure of *Fadd* gene, exon2 of *Fadd-201* (ENSMUST00000033394.7) transcript is recommended as the knockout region. The region contains 332bp coding sequence. Knock out the region will result in disruption of protein function.
- In this project we use CRISPR/Cas9 technology to modify *Fadd* gene. The brief process is as follows: CRISPR/Cas9 system v

- According to the existing MGI data, Mice homozygous for a knock-out allele exhibit embryonic lethality associated with abnormal embryogenesis.
- The *Fadd* gene is located on the Chr7. If the knockout mice are crossed with other mice strains to obtain double gene positive homozygous mouse offspring, please avoid the two genes on the same chromosome.
- This Strategy is designed based on genetic information in existing databases. Due to the complexity of biological processes, all risk of the gene knockout on gene transcription, RNA splicing and protein translation cannot be predicted at the existing technology level.

Gene information (NCBI)

Fadd Fas (TNFRSF6)-associated via death domain [Mus musculus (house mouse)]

Gene ID: 14082, updated on 19-Mar-2019

Summary

Official Symbol	Fadd provided by MGI
Official Full Name	Fas (TNFRSF6)-associated via death domain provided by MGI
Primary source	MGI:MGI:109324
See related	Ensembl:ENSMUSG00000031077
Gene type	protein coding
RefSeq status	VALIDATED
Organism	Mus musculus
Lineage	Eukaryota; Metazoa; Chordata; Craniata; Vertebrata; Euteleostomi; Mammalia; Eutheria; Euarchontoglires; Glires; Rodentia; Myomorpha; Muroidea; Muridae; Murinae; Mus; Mus
Also known as	Mort1/FADD
Expression	Ubiquitous expression in ovary adult (RPKM 10.0), large intestine adult (RPKM 9.9) and 28 other tissues See more
Orthologs	human all

Transcript information (Ensembl)

The gene has 1 transcript, and the transcript is shown below:

Name	Transcript ID	bp	Protein	Biotype	CCDS	UniProt	Flags
Fadd-201	ENSMUST00000033394.7	3903	205aa	Protein coding	CCDS22050	Q61160	TSL:1 GENCODE basic APPRIS P1

The strategy is based on the design of *Fadd-201* transcript, The transcription is shown below

Genomic location distribution

Protein domain

Mouse phenotype description(MGI)

Phenotypes affected by the gene are marked in blue. Data quoted from MGI database(<http://www.informatics.jax.org/>).

According to the existing MGI data, Mice homozygous for a knock-out allele exhibit embryonic lethality associated with abnormal embryogenesis.
