

Nom1 Cas9-CKO Strategy

Designer: JiaYu

Project Overview

Project Name

Nom1

Project type

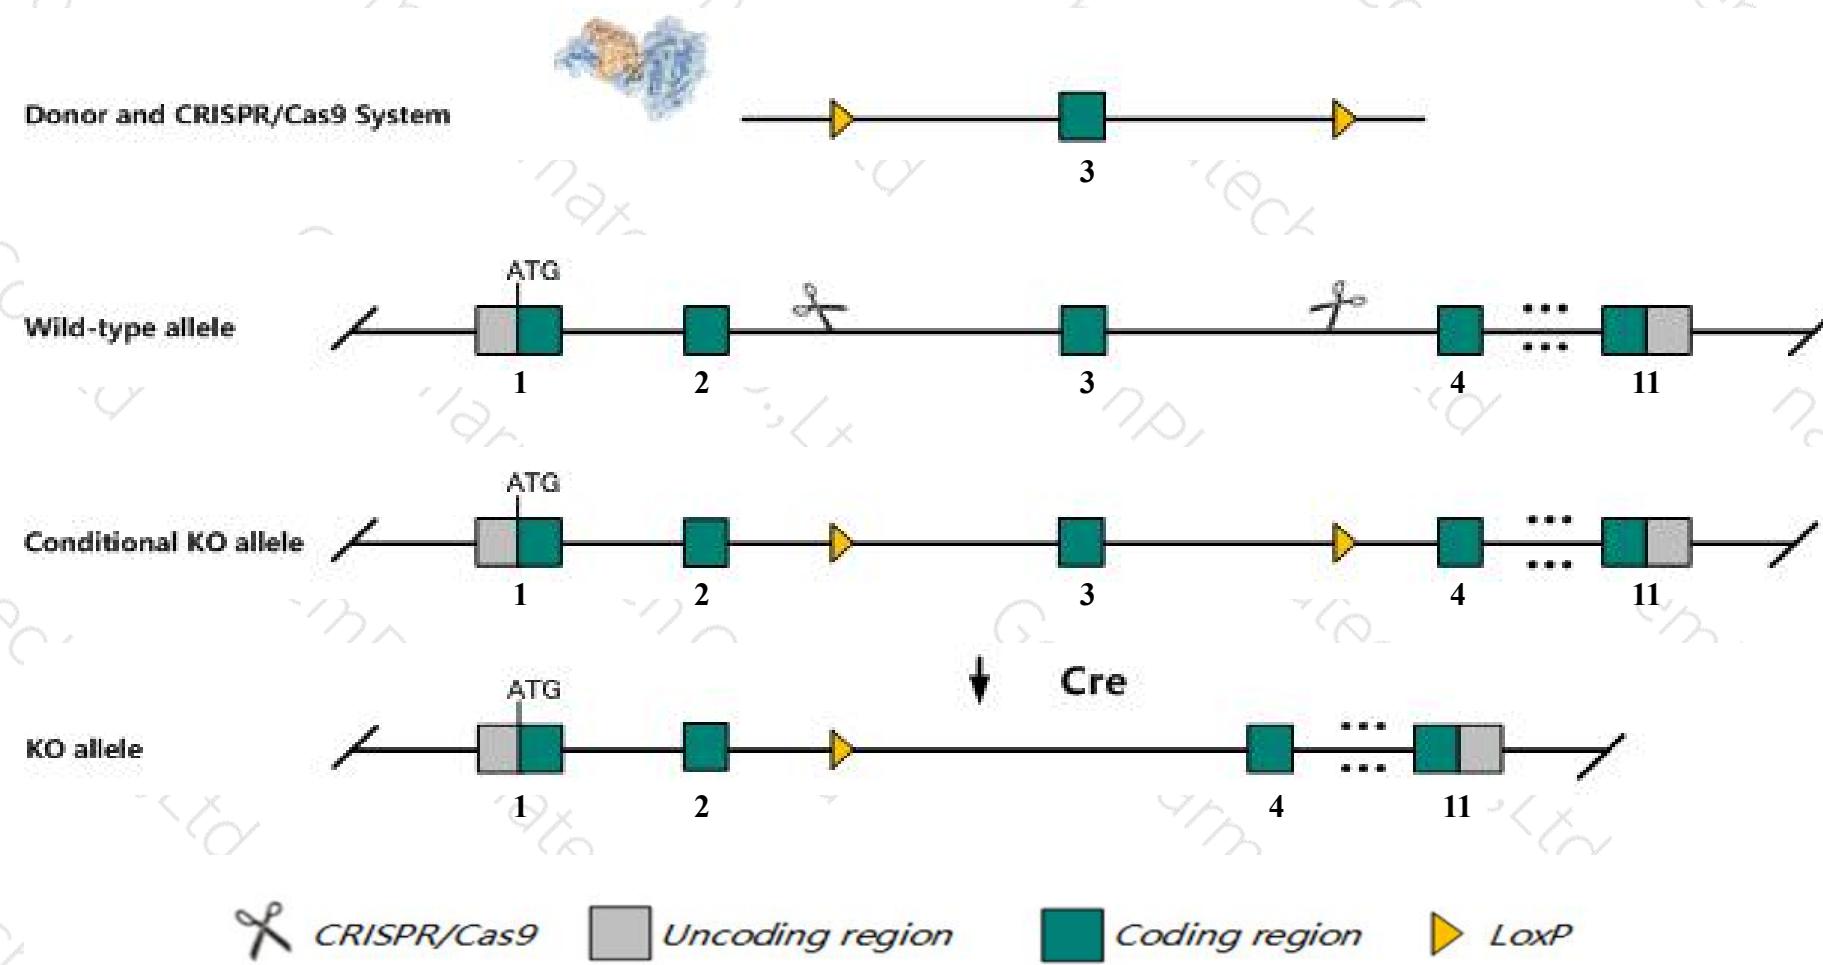

Cas9-CKO

Strain background

C57BL/6JGpt

Conditional Knockout strategy

This model will use CRISPR/Cas9 technology to edit the *Nom1* gene. The schematic diagram is as follows:

Technical routes

- The *Noml* gene has 2 transcripts. According to the structure of *Noml* gene, exon3 of *Noml-201* (ENSMUST00000001611.10) transcript is recommended as the knockout region. The region contains 196bp coding sequence. Knock out the region will result in disruption of protein function.
- In this project we use CRISPR/Cas9 technology to modify *Noml* gene. The brief process is as follows:CRISPR/Cas9 system and Donor were microinjected into the fertilized eggs of C57BL/6JGpt mice. Fertilized eggs were transplanted to obtain positive F0 mice which were confirmed by PCR and sequencing. A stable F1 generation mouse model was obtained by mating positive F0 generation mice with C57BL/6JGpt mice.
- The flox mice will be knocked out after mating with mice expressing Cre recombinase, resulting in the loss of function of the target gene in specific tissues and cell types.

Notice

- The *Nom1* gene is located on the Chr5. If the knockout mice are crossed with other mice strains to obtain double gene positive homozygous mouse offspring, please avoid the two genes on the same chromosome.
- This Strategy is designed based on genetic information in existing databases. Due to the complexity of biological processes, all risk of loxp insertion on gene transcription, RNA splicing and protein translation cannot be predicted at existing technological level.

Gene information (NCBI)

Nom1 nucleolar protein with MIF4G domain 1 [Mus musculus (house mouse)]

Gene ID: 433864, updated on 31-Jan-2019

Summary

Official Symbol Nom1 provided by [MGI](#)

Official Full Name nucleolar protein with MIF4G domain 1 provided by [MGI](#)

Primary source [MGI:MGI:1861749](#)

See related [Ensembl:ENSMUSG00000001569](#)

Gene type protein coding

RefSeq status VALIDATED

Organism [Mus musculus](#)

Lineage Eukaryota; Metazoa; Chordata; Craniata; Vertebrata; Euteleostomi; Mammalia; Eutheria; Euarchontoglires; Glires; Rodentia; Myomorpha; Muroidea; Muridae; Murinae; Mus; Mus

Also known as D5Kng1, Gm1040

Expression Ubiquitous expression in CNS E11.5 (RPKM 7.8), liver E14 (RPKM 6.0) and 28 other tissues [See more](#)

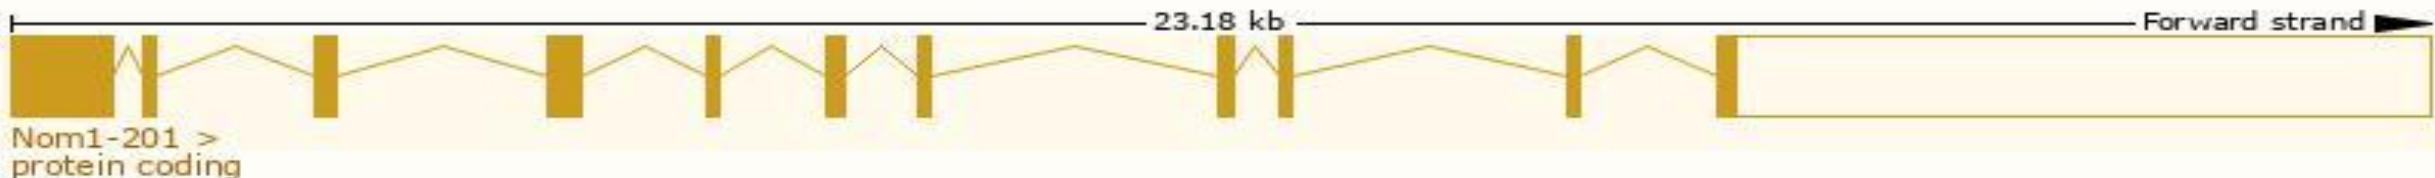

Orthologs [human](#) [all](#)

Transcript information (Ensembl)

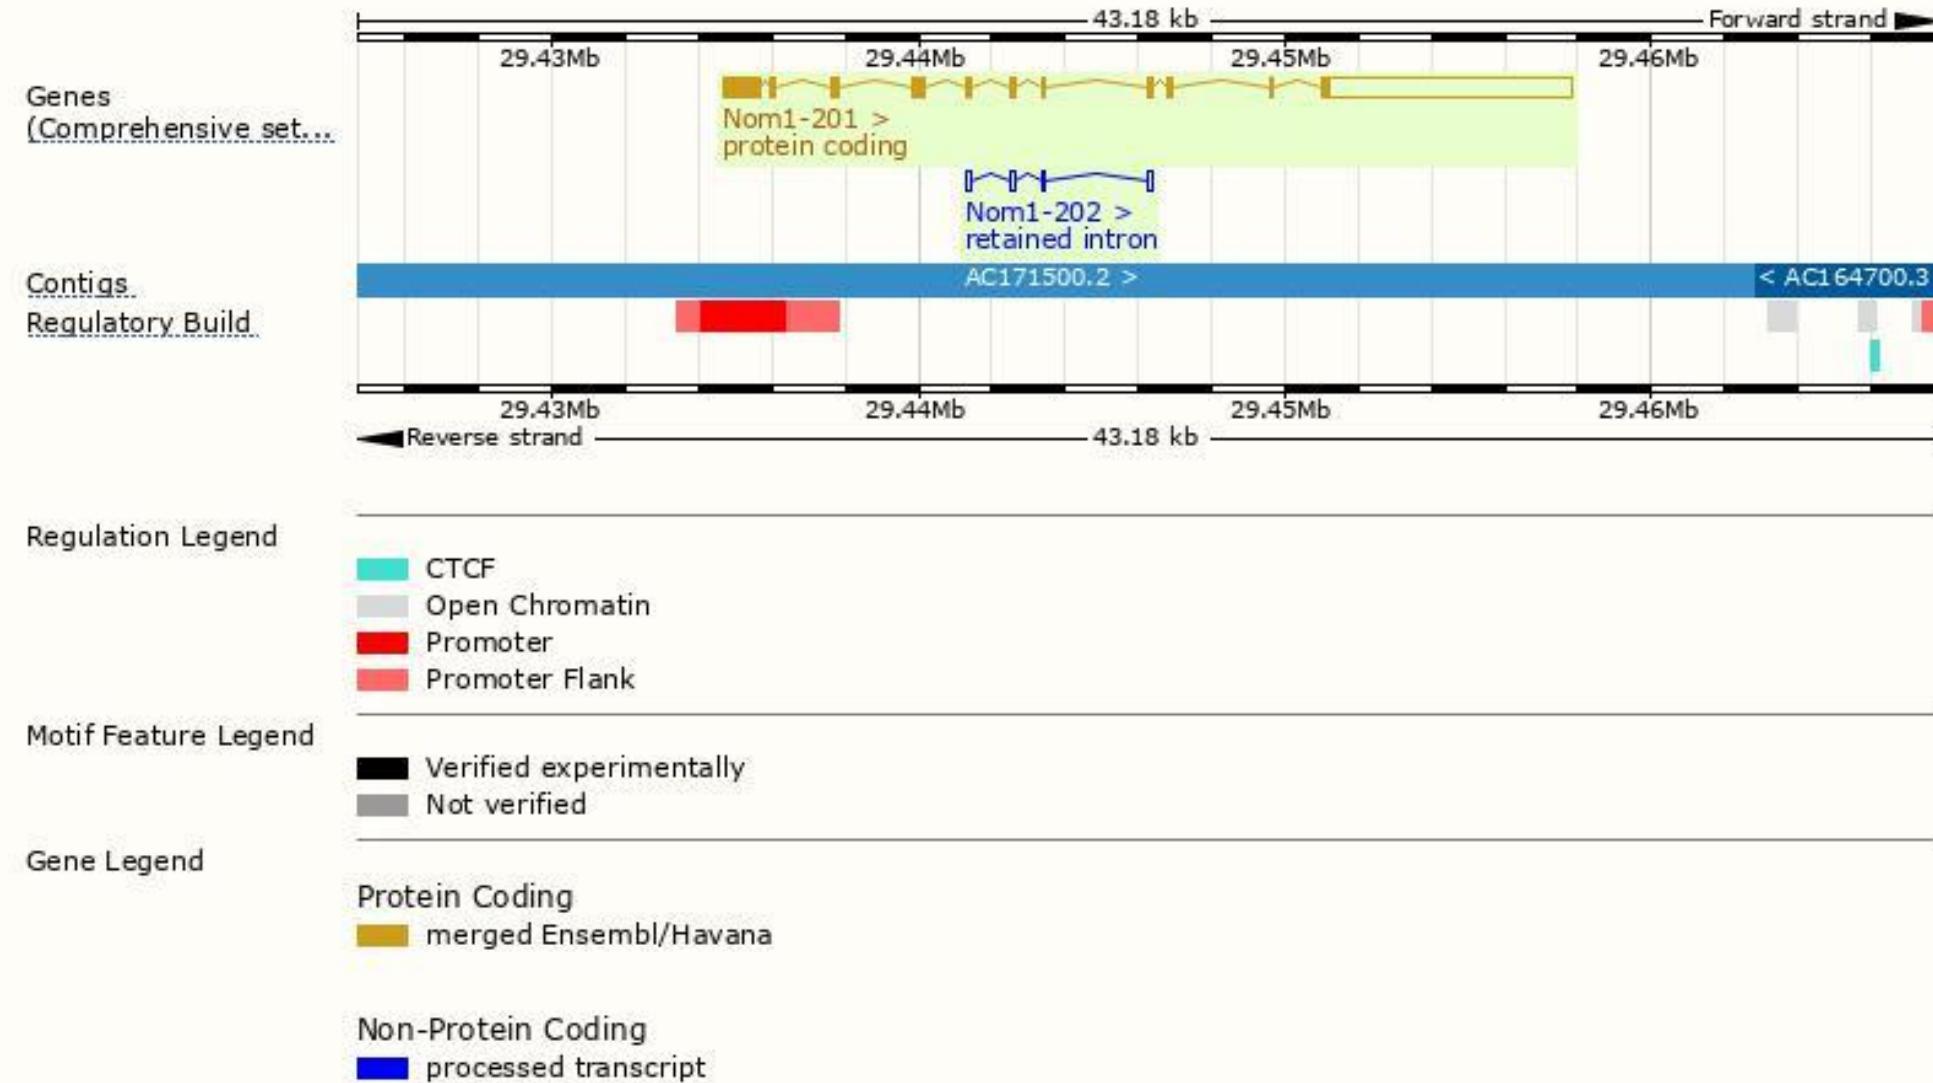

The gene has 2 transcripts, all transcripts are shown below:

Name	Transcript ID	bp	Protein	Biotype	CCDS	UniProt	Flags
Nom1-201	ENSMUST00000001611.10	9219	854aa	Protein coding	CCDS19149	Q3UFM5	TSL:1 GENCODE basic APPRIS P1
Nom1-202	ENSMUST00000146347.1	531	No protein	Retained intron			TSL:2

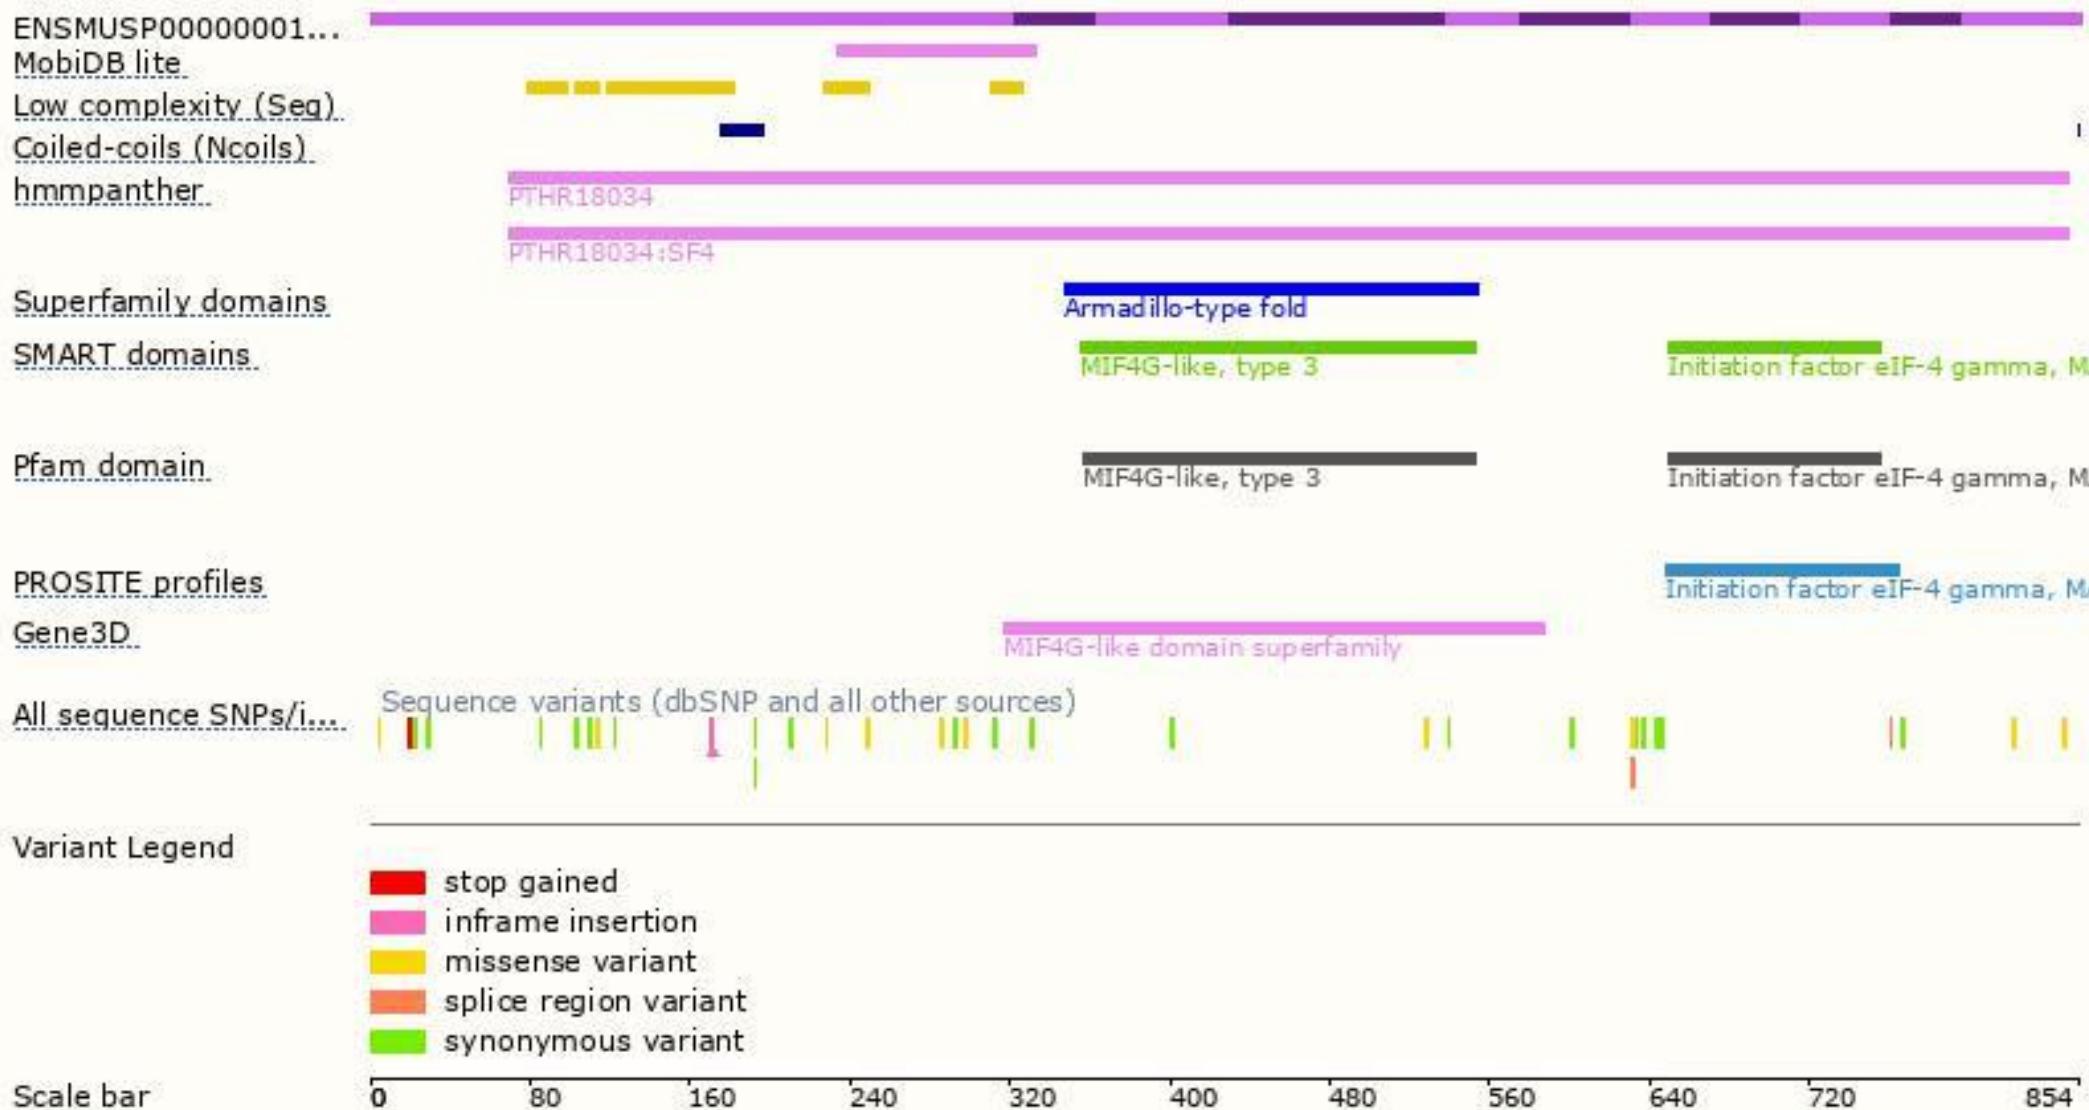

The strategy is based on the design of *Nom1-201* transcript, The transcription is shown below

Genomic location distribution

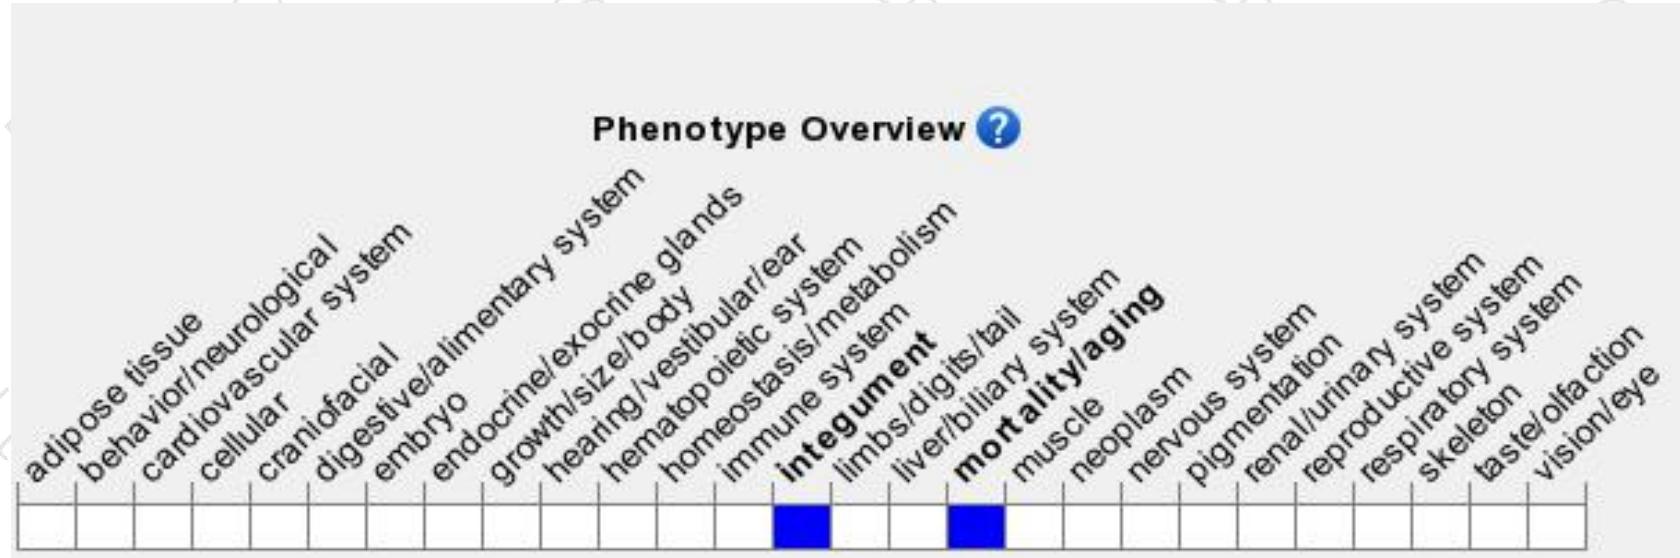

Protein domain
