

Topors Cas9-CKO Strategy

Designer:

Daohua Xu

Reviewer:

Huimin Su

Design Date:

2019-11-26

Project Overview

Project Name

Topors

Project type

Cas9-CKO

Strain background

C57BL/6JGpt

Conditional Knockout strategy

This model will use CRISPR/Cas9 technology to edit the *Topors* gene. The schematic diagram is as follows:

- The *Topors* gene has 1 transcript. According to the structure of *Topors* gene, exon3 of *Topors-201* (ENSMUST00000042575.6) transcript is recommended as the knockout region. The region contains most of the coding sequence. Knock out the region will result in disruption of protein function.
- In this project we use CRISPR/Cas9 technology to modify *Topors* gene. The brief process is as follows: CRISPR/Cas9 system and Donor were microinjected into the fertilized eggs of C57BL/6JGpt mice. Fertilized eggs were transplanted to obtain positive F0 mice which were confirmed by PCR and sequencing. A stable F1 generation mouse model was obtained by mating positive F0 generation mice with C57BL/6JGpt mice.
- The flox mice will be knocked out after mating with mice expressing Cre recombinase, resulting in the loss of function of the target gene in specific tissues and cell types.

Notice

- The *Topors* gene is located on the Chr4. If the knockout mice are crossed with other mice strains to obtain double gene positive homozygous mouse offspring, please avoid the two genes on the same chromosome.
- This Strategy is designed based on genetic information in existing databases. Due to the complexity of biological processes, all risk of loxp insertion on gene transcription, RNA splicing and protein translation cannot be predicted at existing technological level.

Gene information (NCBI)

Topors topoisomerase I binding, arginine/serine-rich [Mus musculus (house mouse)]

Gene ID: 106021, updated on 31-Jan-2019

Summary

Official Symbol	Topors provided by MGI
Official Full Name	topoisomerase I binding, arginine/serine-rich provided by MGI
Primary source	MGI:MGI:2146189
See related	Ensembl:ENSMUSG000000036822
Gene type	protein coding
RefSeq status	VALIDATED
Organism	Mus musculus
Lineage	Eukaryota; Metazoa; Chordata; Craniata; Vertebrata; Euteleostomi; Mammalia; Eutheria; Euarchontoglires; Glires; Rodentia; Myomorpha; Muroidea; Muridae; Murinae; Mus; Mus
Also known as	AW105885, LUN, TP53BPL, p53BP3/LUN
Expression	Ubiquitous expression in CNS E11.5 (RPKM 10.1), placenta adult (RPKM 9.9) and 28 other tissues See more
Orthologs	human all

Transcript information (Ensembl)

The gene has 1 transcript, and the transcript is shown below:

Name	Transcript ID	bp	Protein	Biotype	CCDS	UniProt	Flags
Topors-201	ENSMUST00000042575.6	3856	1033aa	Protein coding	CCDS38710	Q80Z37	TSL:1 GENCODE basic APPRIS P1

The strategy is based on the design of *Topors-201* transcript, The transcription is shown below

Genomic location distribution

Protein domain
