

Cetn1 Cas9-CKO Strategy

Designer:

Daohua Xu

Reviewer:

Huimin Su

Design Date:

2020-2-19

Project Overview

Project Name

Cetn1

Project type

Cas9-CKO

Strain background

C57BL/6JGpt

Conditional Knockout strategy

This model will use CRISPR/Cas9 technology to edit the *Cetn1* gene. The schematic diagram is as follows:

- The *Cetn1* gene has 3 transcripts. According to the structure of *Cetn1* gene, exon1 of *Cetn1-201* (ENSMUST00000062769.6) transcript is recommended as the knockout region. The region contains all of the coding sequence. Knock out the region will result in disruption of protein function.
- In this project we use CRISPR/Cas9 technology to modify *Cetn1* gene. The brief process is as follows: CRISPR/Cas9 system and Donor were microinjected into the fertilized eggs of C57BL/6JGpt mice. Fertilized eggs were transplanted to obtain positive F0 mice which were confirmed by PCR and sequencing. A stable F1 generation mouse model was obtained by mating positive F0 generation mice with C57BL/6JGpt mice.
- The flox mice will be knocked out after mating with mice expressing Cre recombinase, resulting in the loss of function of the target gene in specific tissues and cell types.

Notice

- The *Cetn1* gene is located on the Chr18. If the knockout mice are crossed with other mice strains to obtain double gene positive homozygous mouse offspring, please avoid the two genes on the same chromosome.
- This Strategy is designed based on genetic information in existing databases. Due to the complexity of biological processes, all risk of loxp insertion on gene transcription, RNA splicing and protein translation cannot be predicted at existing technological level.

Gene information (NCBI)

Cetn1 centrin 1 [Mus musculus (house mouse)]

Gene ID: 26369, updated on 9-Apr-2019

Summary

Official Symbol	Cetn1 provided by MGI
Official Full Name	centrin 1 provided by MGI
Primary source	MGI:MGI:1347086
See related	Ensembl:ENSMUSG00000050996
Gene type	protein coding
RefSeq status	VALIDATED
Organism	Mus musculus
Lineage	Eukaryota; Metazoa; Chordata; Craniata; Vertebrata; Euteleostomi; Mammalia; Eutheria; Euarchontoglires; Glires; Rodentia; Myomorpha; Muroidea; Muridae; Murinae; Mus; Mus
Also known as	caltractin
Orthologs	human all

Transcript information (Ensembl)

The gene has 3 transcripts,all transcripts are shown below:

Name	Transcript ID	bp	Protein	Biotype	CCDS	UniProt	Flags
Cetn1-201	ENSMUST00000062769.6	1247	172aa	Protein coding	CCDS37731	P41209	TSL:1 GENCODE basic APPRIS P1
Cetn1-202	ENSMUST00000234003.1	1051	172aa	Protein coding	CCDS37731	-	GENCODE basic APPRIS P1
Cetn1-203	ENSMUST00000234590.1	1247	172aa	Nonsense mediated decay	CCDS37731	-	

The strategy is based on the design of *Cetn1-201* transcript,The transcription is shown below

Genomic location distribution

Protein domain
