Project Overview

Project Name

Trmt10b

Project type

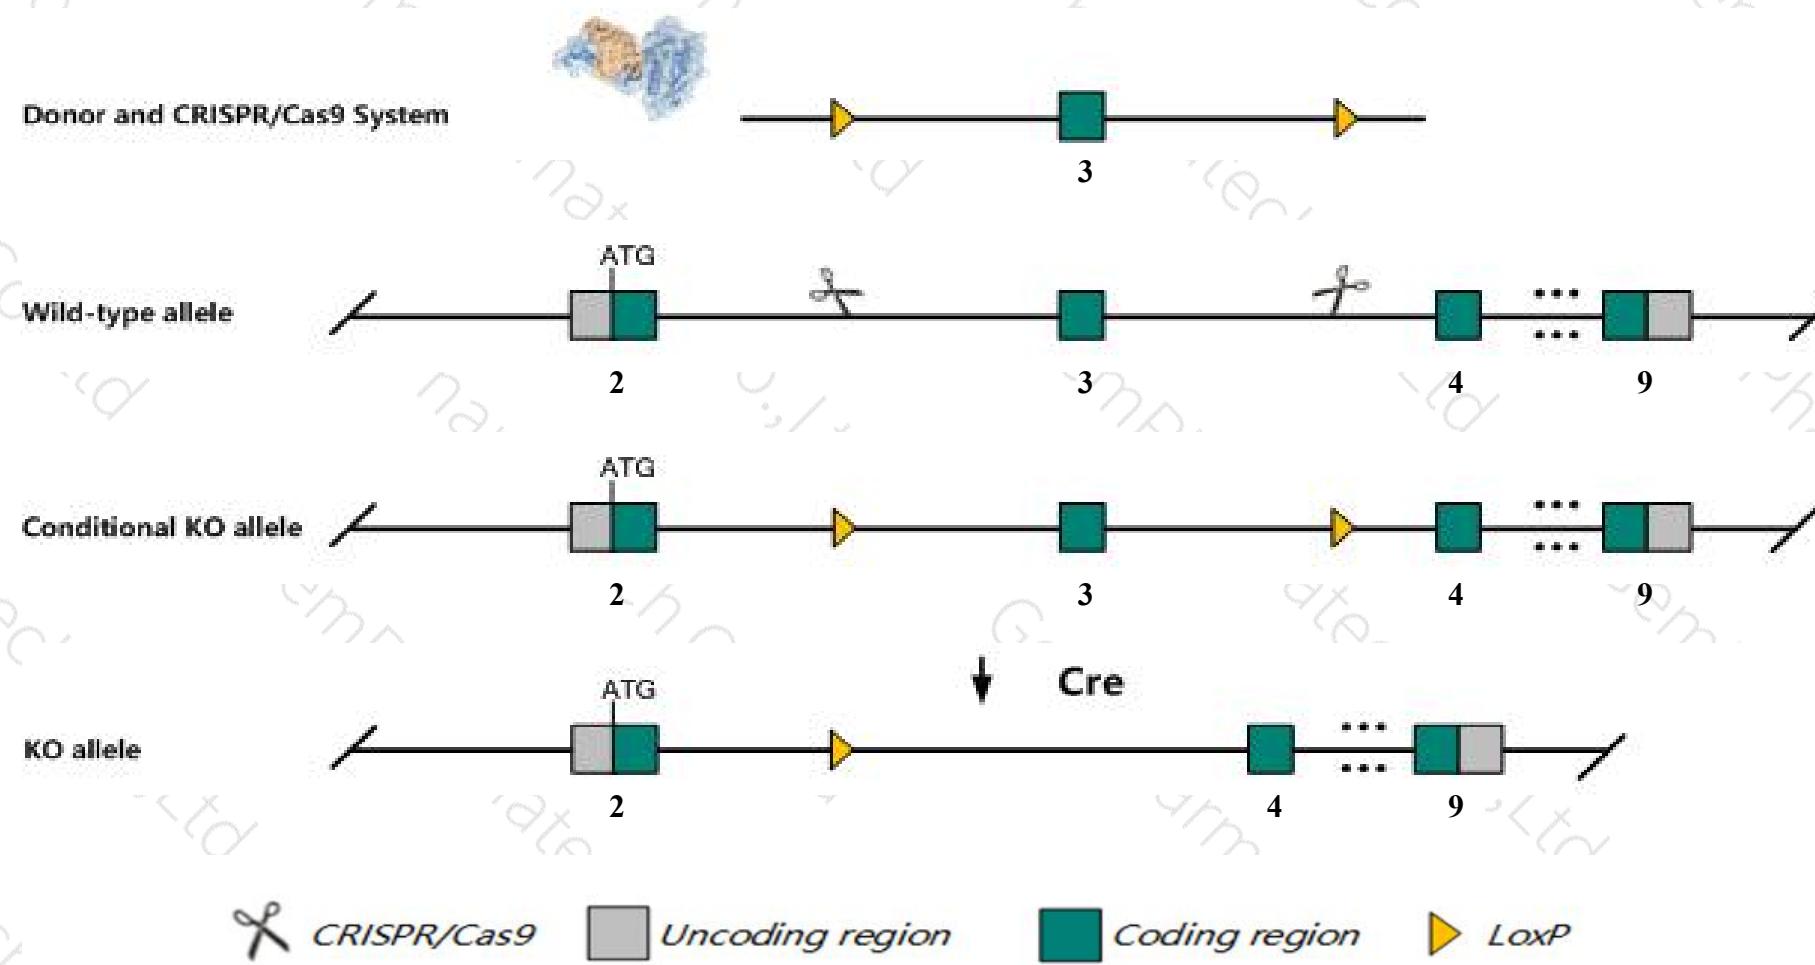

Cas9-CKO

Strain background

C57BL/6JGpt

Conditional Knockout strategy

This model will use CRISPR/Cas9 technology to edit the *Trmt10b* gene. The schematic diagram is as follows:

Technical routes

- The *Trmt10b* gene has 7 transcripts. According to the structure of *Trmt10b* gene, exon3 of *Trmt10b-201* (ENSMUST00000044673.8) transcript is recommended as the knockout region. The region contains 115bp coding sequence. Knock out the region will result in disruption of protein function.
- In this project we use CRISPR/Cas9 technology to modify *Trmt10b* gene. The brief process is as follows:CRISPR/Cas9 system and Donor were microinjected into the fertilized eggs of C57BL/6JGpt mice. Fertilized eggs were transplanted to obtain positive F0 mice which were confirmed by PCR and sequencing. A stable F1 generation mouse model was obtained by mating positive F0 generation mice with C57BL/6JGpt mice.
- The flox mice will be knocked out after mating with mice expressing Cre recombinase, resulting in the loss of function of the target gene in specific tissues and cell types.

Notice

- The effect on transcript *Trmt10b-203* is unknown.
- Transcript *Trmt10b-207* may not be affected.
- The *Trmt10b* gene is located on the Chr4. If the knockout mice are crossed with other mice strains to obtain double gene positive homozygous mouse offspring, please avoid the two genes on the same chromosome.
- This strategy is designed based on genetic information in existing databases. Due to the complexity of biological processes, all risk of loxp insertion on gene transcription, RNA splicing and protein translation cannot be predicted at existing technological level.

Gene information (NCBI)

Trmt10b tRNA methyltransferase 10B [Mus musculus (house mouse)]

Gene ID: 69934, updated on 13-Mar-2020

Summary

Official Symbol Trmt10b provided by [MGI](#)

Official Full Name tRNA methyltransferase 10B provided by [MGI](#)

Primary source [MGI:MGI:1917184](#)

See related [Ensembl:ENSMUSG00000035601](#)

Gene type protein coding

RefSeq status PROVISIONAL

Organism [Mus musculus](#)

Lineage Eukaryota; Metazoa; Chordata; Craniata; Vertebrata; Euteleostomi; Mammalia; Eutheria; Euarchontoglires; Glires; Rodentia; Myomorpha; Muroidea; Muridae; Murinae; Mus; Mus

Also known as 2610042J10Rik, Rg9mtd3, Rnmtd3

Expression Ubiquitous expression in CNS E18 (RPKM 4.1), CNS E11.5 (RPKM 4.0) and 25 other tissues [See more](#)

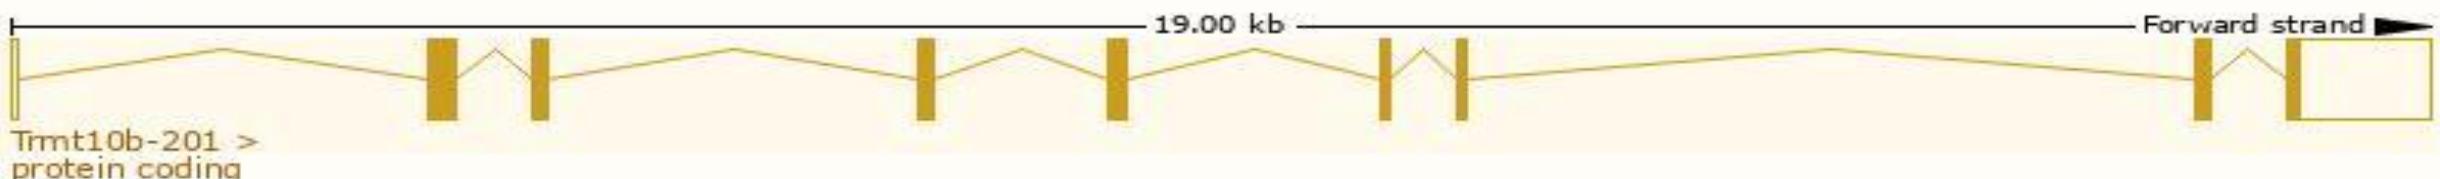

Orthologs [human](#) [all](#)

Transcript information (Ensembl)

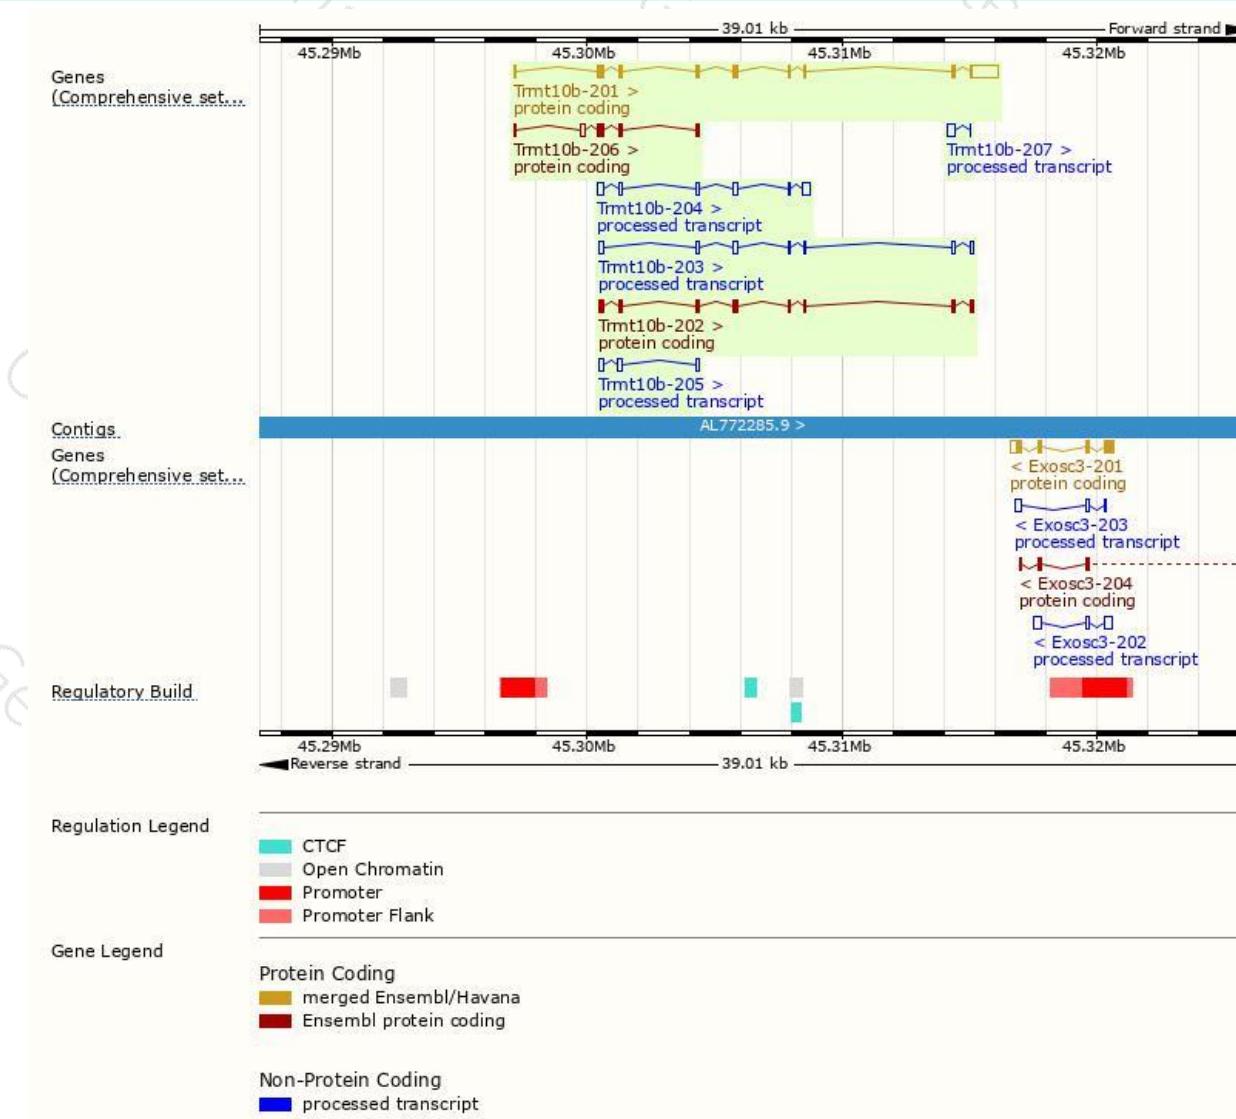

The gene has 7 transcripts, all transcripts are shown below:

Name	Transcript ID	bp	Protein	Biotype	CCDS	UniProt	Flags
Trmt10b-201	ENSMUST00000044673.8	2064	318aa	Protein coding	CCDS18135	Q9D075	TSL:1 GENCODE basic APPRIS is a system to annotate alternatively spliced transcripts based on a range of computational methods to identify the most functionally important transcript(s) of a gene. APPRIS P2
