

***Slc15a2* Cas9-KO Strategy**

Designer: Xueting Zhang

Reviewer: Yanhua Shen

Date: 2019-12-31

Project Overview

Project Name

Slc15a2

Project type

Cas9-KO

Strain background

C57BL/6JGpt

Knockout strategy

This model will use CRISPR/Cas9 technology to edit the *Slc15a2* gene. The schematic diagram is as follows:

- The *Slc15a2* gene has 14 transcripts. According to the structure of *Slc15a2* gene, exon2-exon3 of *Slc15a2-201* (ENSMUST00000023616.9) transcript is recommended as the knockout region. The region contains 230bp coding sequence. Knock out the region will result in disruption of protein function.
- In this project we use CRISPR/Cas9 technology to modify *Slc15a2* gene. The brief process is as follows: CRISPR/Cas9 system

- According to the existing MGI data, Homozygous mutant mice have impairments of dipeptide transportation, however, show no gross defects.
- Transcript *Slc15a2*-202&203&204&206&209&210&211&214 may not be affected.
- The *Slc15a2* gene is located on the Chr16. If the knockout mice are crossed with other mice strains to obtain double gene positive homozygous mouse offspring, please avoid the two genes on the same chromosome.
- This Strategy is designed based on genetic information in existing databases. Due to the complexity of biological processes, all risk of the gene knockout on gene transcription, RNA splicing and protein translation cannot be predicted at the existing technology level.

Gene information (NCBI)

Slc15a2 solute carrier family 15 (H+/peptide transporter), member 2 [*Mus musculus* (house mouse)]

Gene ID: 57738, updated on 12-Aug-2019

Summary

- Official Symbol** Slc15a2 provided by [MGI](#)
- Official Full Name** solute carrier family 15 (H+/peptide transporter), member 2 provided by [MGI](#)
- Primary source** [MGI:MGI:1890457](#)
- See related** [Ensembl:ENSMUSG00000022899](#)
- Gene type** protein coding
- RefSeq status** VALIDATED
- Organism** [Mus musculus](#)
- Lineage** Eukaryota; Metazoa; Chordata; Craniata; Vertebrata; Euteleostomi; Mammalia; Eutheria; Euarchontoglires; Glires; Rodentia; Myomorpha; Muroidea; Muridae; Murinae; Mus; Mus
- Also known as** Pept2; C78862; 8430408C16Rik
- Expression** Broad expression in kidney adult (RPKM 7.8), frontal lobe adult (RPKM 3.5) and 17 other tissues [See more](#)
- Orthologs** [human](#) [all](#)

Genomic context

Location: 16; 16 B3

See Slc15a2 in [Genome Data Viewer](#)

Exon count: 24

Annotation release	Status	Assembly	Chr	Location

Slc15a2-206	ENSMUST00000164770.7	874	No protein	lncRNA	-	-	TSL:5
Slc15a2-214	ENSMUST00000172382.1	694	No protein	lncRNA	-	-	TSL:3
Slc15a2-202	ENSMUST00000100308.9	430	No protein	lncRNA	-	-	TSL:3

The strategy is based on the design of *Slc15a2-201* transcript,The transcription is shown below

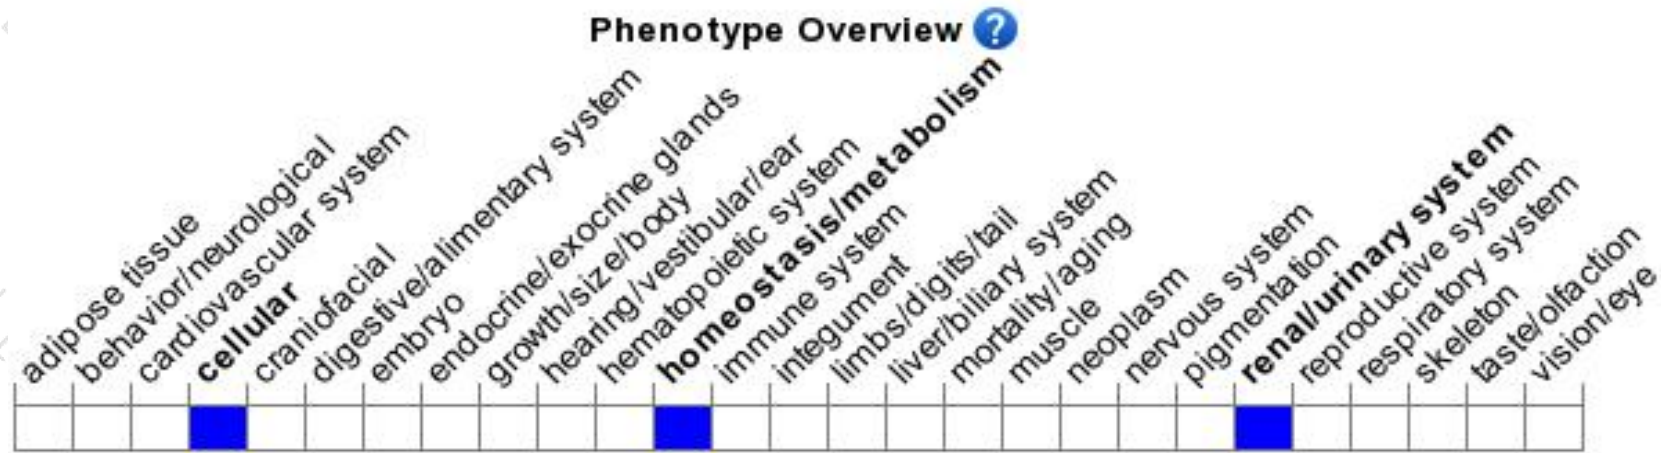

Genomic location distribution

Protein domain

Mouse phenotype description(MGI)

Phenotypes affected by the gene are marked in blue. Data quoted from MGI database(<http://www.informatics.jax.org/>).

According to the existing MGI data, Homozygous mutant mice have impairments of dipeptide transport, however, show no gross defects.
