

# **Defb29** Cas9-KO Strategy

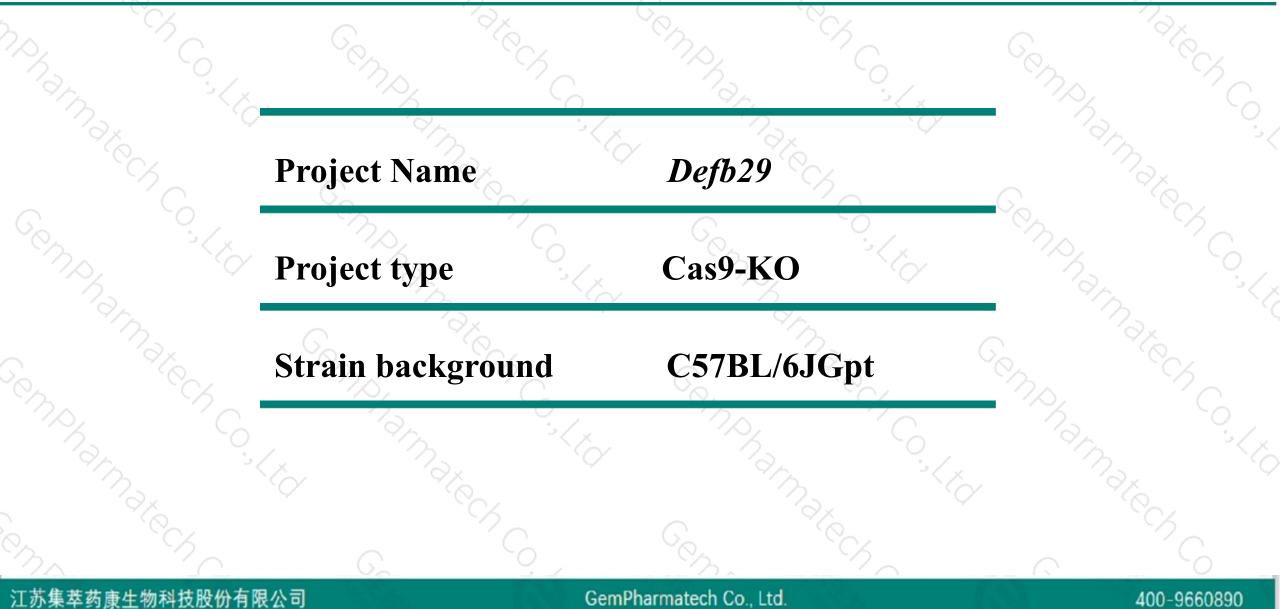

**Designer: JiaYu** 

**Reviewer: Xiaojing Li** 

**Design Date: 2020-7-20** 

## **Project Overview**

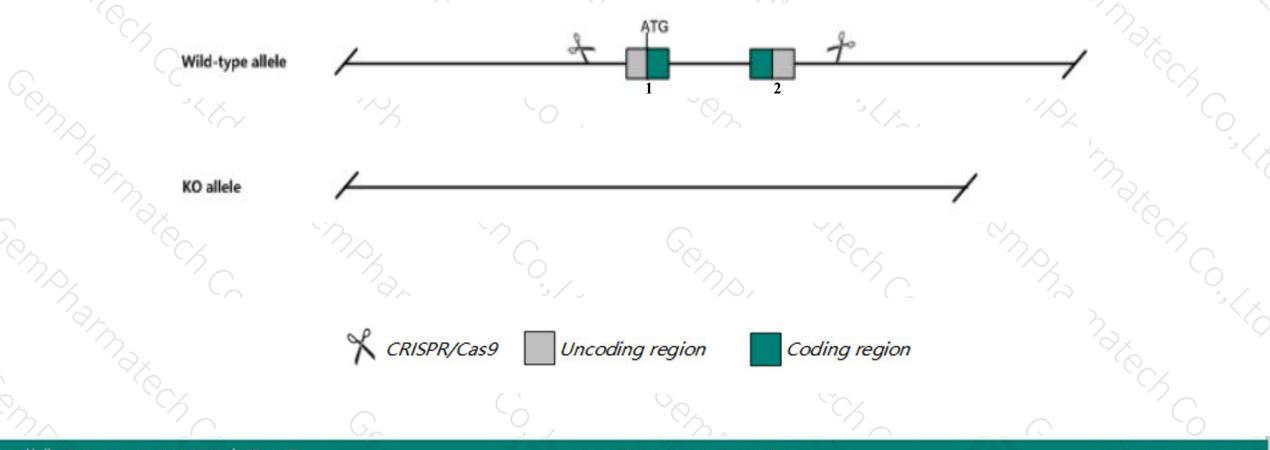

# **Knockout** strategy

400-9660890

This model will use CRISPR/Cas9 technology to edit the *Defb29* gene. The schematic diagram is as follows:

江苏集萃药康生物科技股份有限公司

GemPharmatech Co., Ltd.

> The *Defb29* gene has 1 transcript. According to the structure of *Defb29* gene, exon1-exon2 of *Defb29*-201(ENSMUST00000060598.3) transcript is recommended as the knockout region. The region contains all of the coding sequence. Knock out the region will result in disruption of protein function.

> In this project we use CRISPR/Cas9 technology to modify *Defb29* gene. The brief process is as follows: CRISPR/Cas9 system were microinjected into the fertilized eggs of C57BL/6JGpt mice.Fertilized eggs were transplanted to obtain positive F0 mice which were confirmed by PCR and sequencing. A stable F1 generation mouse model was obtained by mating positive F0 generation mice with C57BL/6JGpt mice.

- > The *Defb29* gene is located on the Chr2. If the knockout mice are crossed with other mice strains to obtain double gene positive homozygous mouse offspring, please avoid the two genes on the same chromosome.
- ➤ This strategy is designed based on genetic information in existing databases.Due to the complexity of biological processes,all risk of the gene knockout on gene transcription, RNA splicing and protein translation cannot be predicted at the existing technology level.

# **Transcript information (Ensembl)**

400-9660890

The gene has 1 transcript, and the transcript is shown below:

Name	Transcript ID	ript ID bp Protein Biotype CCDS UniProt Fla		Flags	5			
Defb29-201	ENSMUST0000060598.3	462	<u>78aa</u>	Protein coding	CCDS38276	A3KGR0 Q8BGW9	TSL:1 GENCODE basic APPRIS P1	

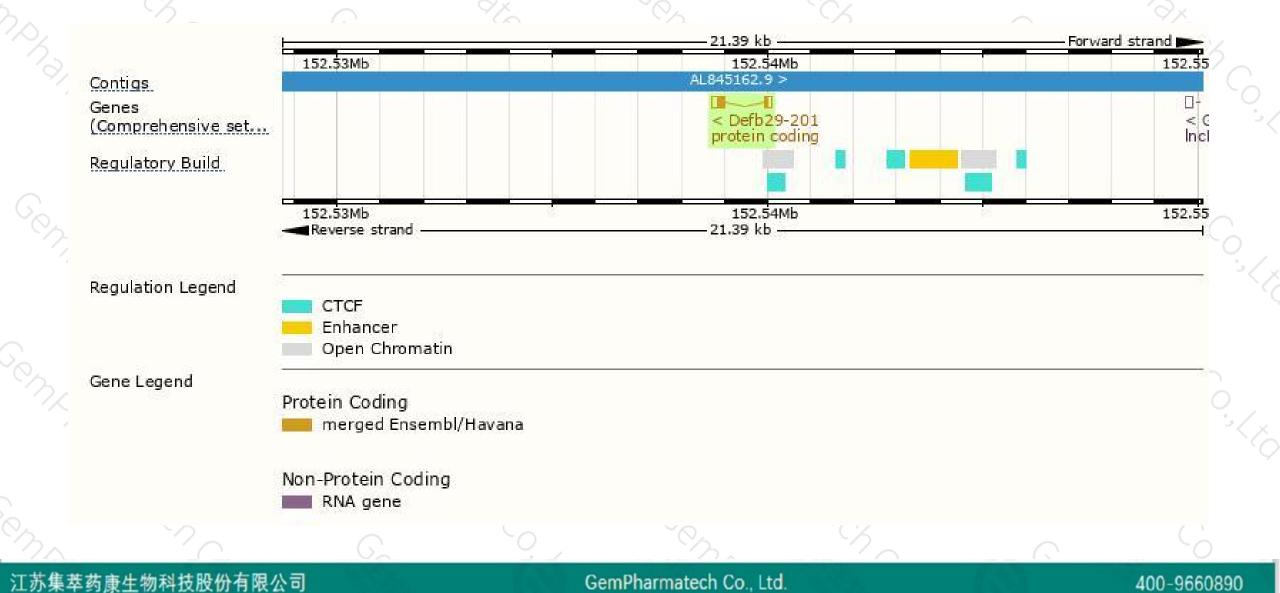

The strategy is based on the design of *Defb29-201* transcript, the transcription is shown below:

< Defb29-201 protein coding
