

CcIn Cas9-KO Strategy

Designer: Xueting Zhang

Reviewer: Daohua Xu

Design Date: 2020-9-3

Project Overview

Project Name***Cc1n***

Project type**Cas9-KO**

Strain background**C57BL/6JGpt**

Knockout strategy

This model will use CRISPR/Cas9 technology to edit the *Cc1n* gene. The schematic diagram is as follows:

Technical routes

- The *Ccin* gene has 1 transcript. According to the structure of *Ccin* gene, exon1 of *Ccin*-201(ENSMUST00000095107.2) transcript is recommended as the knockout region. The region contains all of the coding sequence. Knock out the region will result in disruption of protein function.
- In this project we use CRISPR/Cas9 technology to modify *Ccin* gene. The brief process is as follows: CRISPR/Cas9 system were microinjected into the fertilized eggs of C57BL/6JGpt mice. Fertilized eggs were transplanted to obtain positive F0 mice which were confirmed by PCR and sequencing. A stable F1 generation mouse model was obtained by mating positive F0 generation mice with C57BL/6JGpt mice.

Notice

- The *Ccin* gene is located on the Chr4. If the knockout mice are crossed with other mice strains to obtain double gene positive homozygous mouse offspring, please avoid the two genes on the same chromosome.
- The knockout region is near to the C-terminal of *Glipr2* gene, this strategy may influence the regulatory function of the C-terminal of *Glipr2* gene.
- This strategy is designed based on genetic information in existing databases. Due to the complexity of biological processes, all risk of the gene knockout on gene transcription, RNA splicing and protein translation cannot be predicted at the existing technology level.

Gene information (NCBI)

Ccincalycin [Mus musculus (house mouse)]

Gene ID: 442829, updated on 13-Mar-2020

Summary

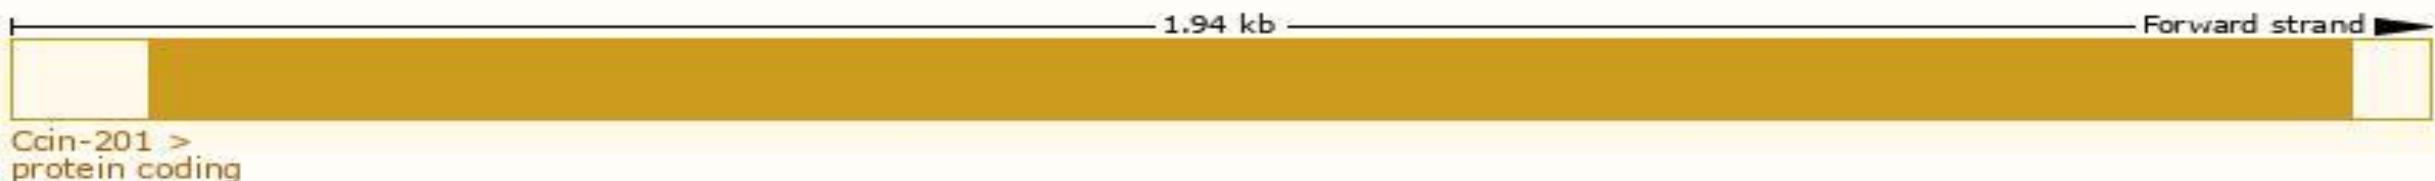

| | |
|---------------------------|---|
| Official Symbol | Ccincalycin provided by MGI |
| Official Full Name | calicin provided by MGI |
| Primary source | MGI:MGIC3045316 |
| See related | Ensembl:ENSMUSG00000070999 |
| Gene type | protein coding |
| RefSeq status | PROVISIONAL |
| Organism | Mus musculus |
| Lineage | Eukaryota; Metazoa; Chordata; Craniata; Vertebrata; Euteleostomi; Mammalia; Eutheria; Euarchontoglires; Glires; Rodentia; Myomorpha; Muroidea; Muridae; Murinae; Mus; Mus |
| Also known as | 4933417A14Rik |
| Orthologs | human all |

Transcript information (Ensembl)

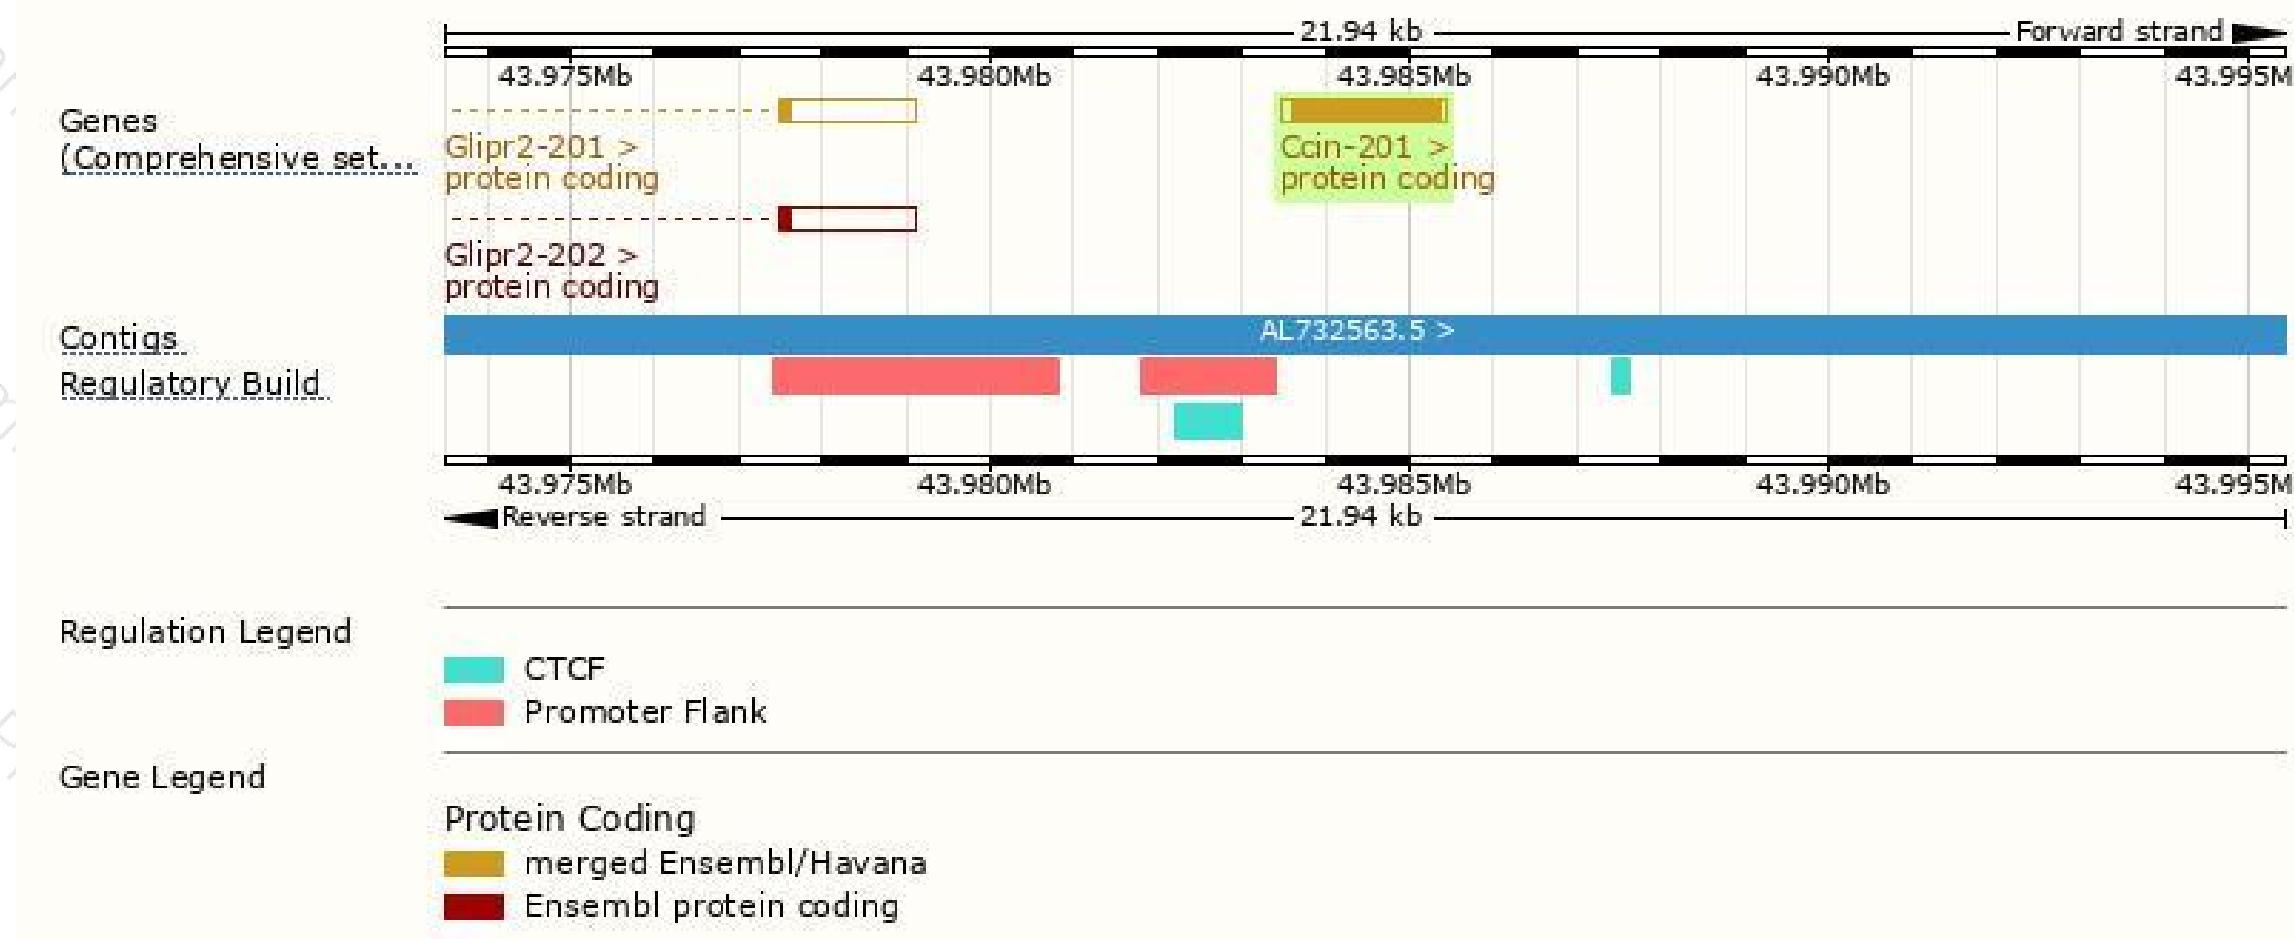

The gene has 1 transcript, and the transcript is shown below:

| Name | Transcript ID | bp | Protein | Biotype | CCDS | UniProt | Flags |
|----------|--------------------------------------|------|-----------------------|----------------|---------------------------|-------------------------------|--------------------------------|
| Ccin-201 | ENSMUST00000095107.2 | 1941 | 588aa | Protein coding | CCDS18118 | B2RX51 Q8CDE2 | TSL:NA GENCODE basic APPRIS P1 |

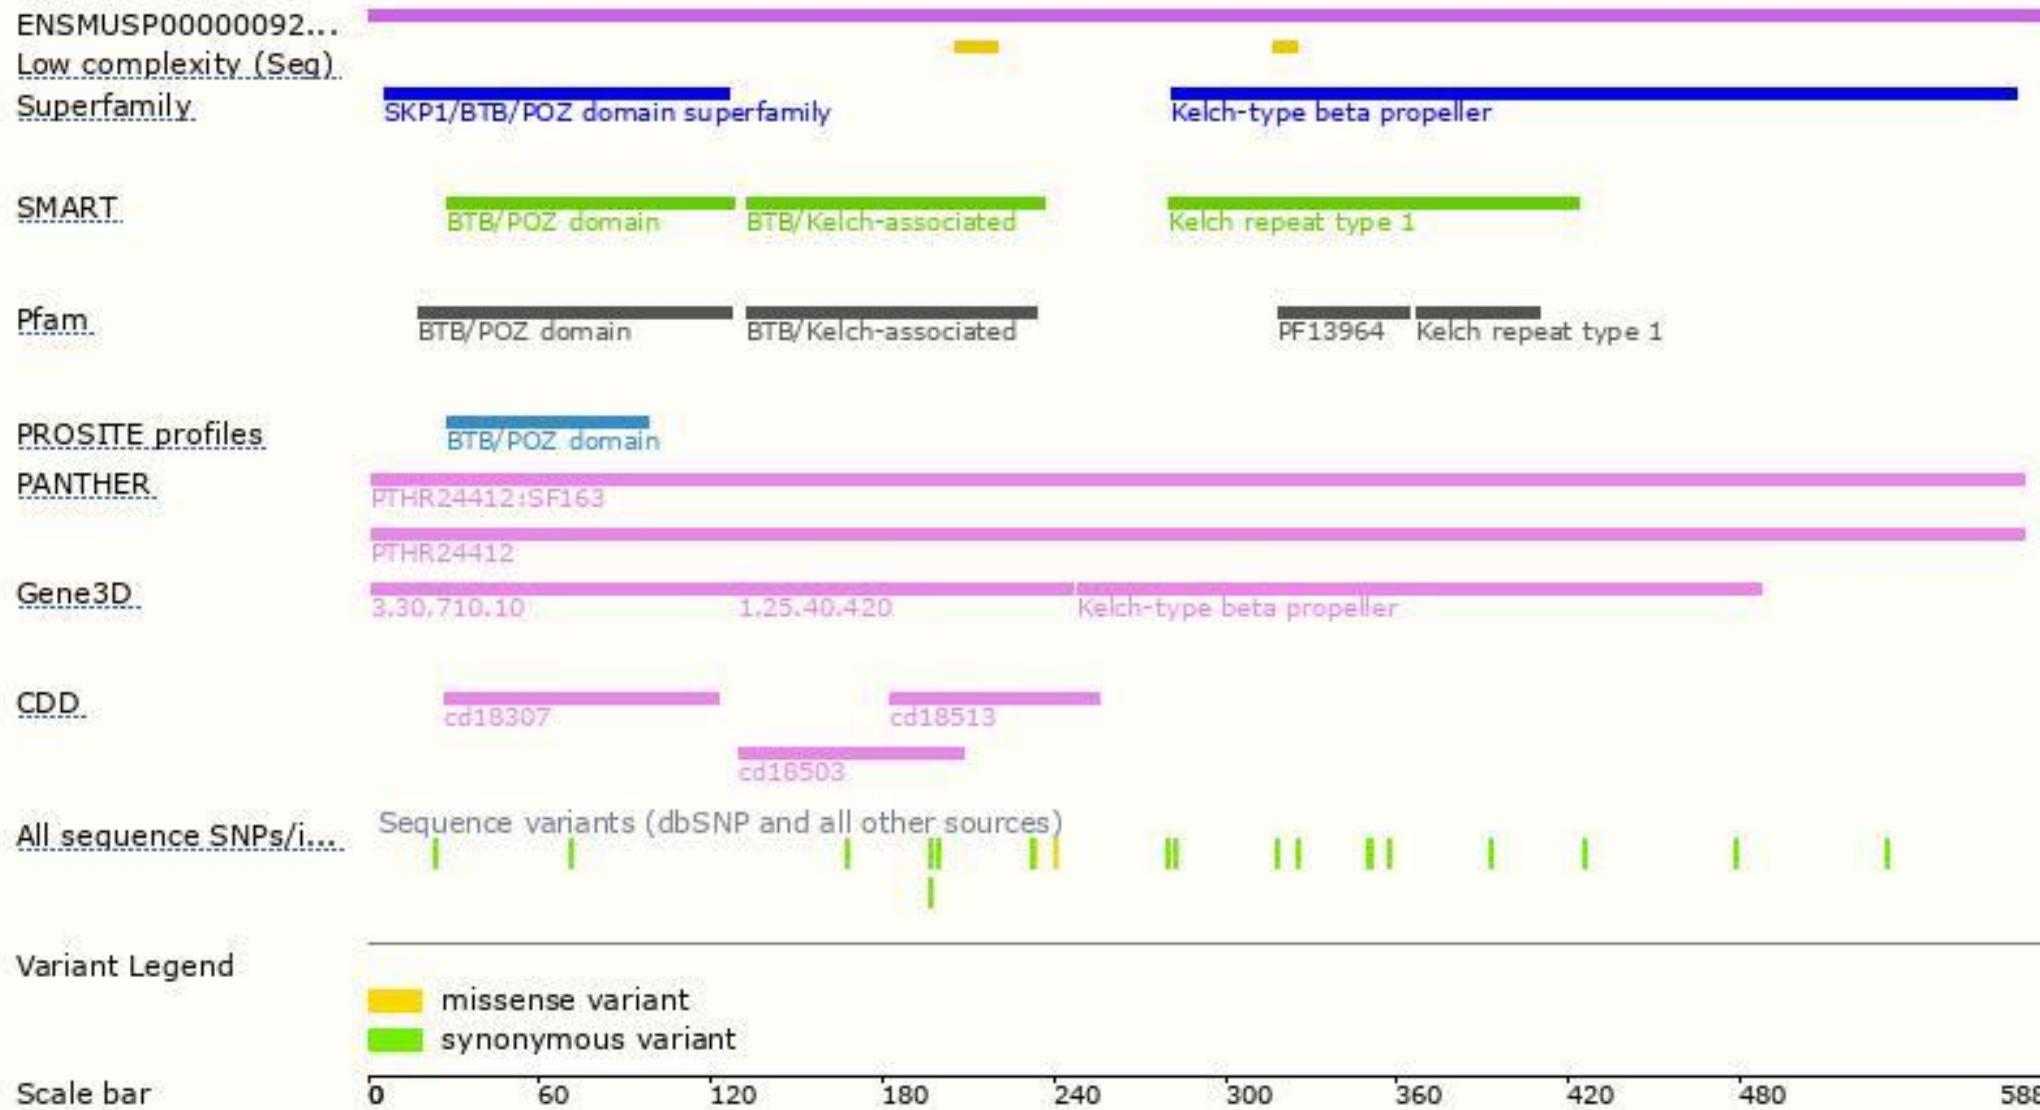

The strategy is based on the design of *Ccin-201* transcript, the transcription is shown below:
