

## Genotyping Report

|           |           |             |           |                    |             |
|-----------|-----------|-------------|-----------|--------------------|-------------|
| Strain ID | T027244   | Strain Type | CKO(Cas9) | Genetic Background | C57BL/6JGpt |
| Designer  | Ya'nan Xu | Gene Name   |           | Zer1               |             |

### 1. Strategy of Genotyping

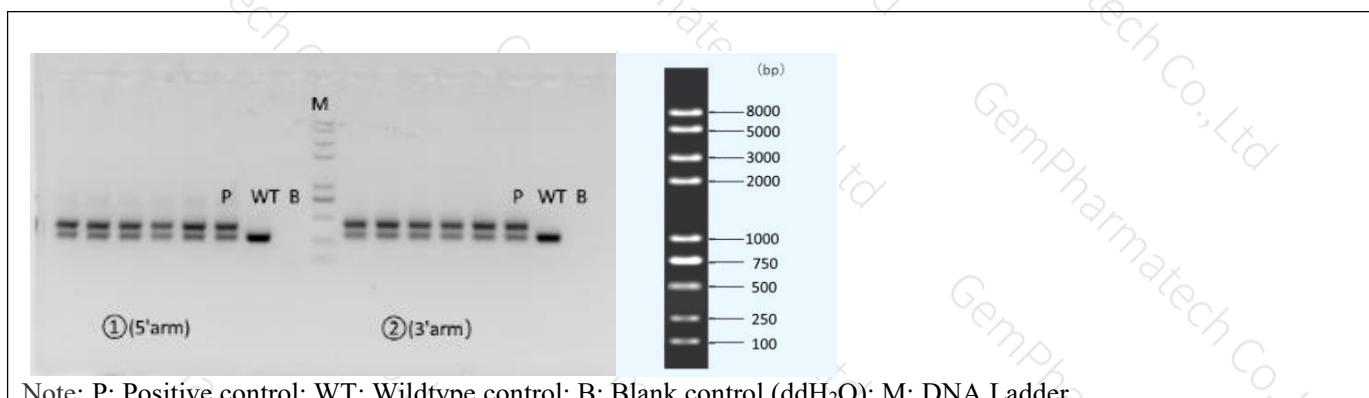

Wild type: ①PCR reaction obtains a single WT band; ②PCR reaction obtains a single WT band.  
Heterozygote: ①PCR reaction obtains a WT band and a Targeted band; ②PCR reaction obtains a WT band and a Targeted band.  
Homozygote: ①PCR reaction obtains a single Targeted band; ②PCR reaction obtains a single Targeted band.  
Note: The sizes of WT and Targeted band are shown below.

### 2. Primer Information

| PCR No.  | Primer No. | Sequence                  | Band Size                    |
|----------|------------|---------------------------|------------------------------|
| ①(5'arm) | T027244-F1 | ACCTGTGCCTGCACCTCTGAACTA  | WT: 278bp<br>Targeted: 383bp |
|          | T027244-R1 | GGCCTACACTGAGTGCTGAGAACAC |                              |
| ②(3'arm) | T027244-F2 | ACGGAACCATCTCTACACTTCCCT  | WT: 298bp<br>Targeted: 404bp |
|          | T027244-R2 | ATCTCTTAGTTCAAGGGCAGCCTG  |                              |

### 3. Gel Image & Conclusion

Note: P: Positive control; WT: Wildtype control; B: Blank control (ddH<sub>2</sub>O); M: DNA Ladder

- ① Control (WT) : It is an important reference mark for whether the PCR reaction is successful and whether the product band position and size meet the theoretical requirements.
- ② Control (B) : PCR amplification was performed without template in the PCR reagent to monitor whether the reagent was contaminated.

#### 4. PCR Condition

| PCR Reaction Component |                                        |             |  |
|------------------------|----------------------------------------|-------------|--|
| Seg.                   | reaction component                     | Volume (μl) |  |
| 1                      | 2 × Rapid Taq Master Mix (Vazyme P222) | 12.5        |  |
| 2                      | ddH <sub>2</sub> O                     | 9.5         |  |
| 3                      | Primer A(10pmol/μl)                    | 1           |  |
| 4                      | Primer B(10pmol/μl)                    | 1           |  |
| 5                      | Template(≈100ng/μl)                    | 1           |  |

| PCR program ① priority selection |                      |      |       |
|----------------------------------|----------------------|------|-------|
| Seg.                             | Temp.                | Time | Cycle |
| 1                                | 95°C                 | 5min |       |
| 2                                | 98°C                 | 30s  | 20×   |
| 3                                | 65°C* (-0.5°C/cycle) | 30s  |       |
| 4                                | 72°C                 | 45s* |       |
| 5                                | 98°C                 | 30s  | 20×   |
| 6                                | 55°C*                | 30s  |       |
| 7                                | 72°C                 | 45s* |       |
| 8                                | 72°C                 | 5min |       |
| 9                                | 10°C                 | hold |       |

| PCR program ② the second choice |       |      |       |
|---------------------------------|-------|------|-------|
| Seg.                            | Temp. | Time | Cycle |
| 1                               | 95°C  | 5min |       |
| 2                               | 98°C  | 30s  | 35×   |
| 3                               | 58°C* | 30s  |       |
| 4                               | 72°C  | 45s* |       |
| 5                               | 72°C  | 5min |       |
| 6                               | 10°C  | hold |       |

Note\*: Annealing temperature and extension time can be determined according to the actual amplification situation and amplification enzyme efficiency.
