

# **Genotyping Report**

| Strain ID | T040337   | Strain Type | CKO(Cas9) | Genetic Background | C57BL/6JGpt |
|-----------|-----------|-------------|-----------|--------------------|-------------|
| Designer  | Ya'nan Xu | Gene Name   | 3         | Supt7l             | 0           |

## 1. Strategy of Genotyping

Wild type: ①PCR reaction obtains a single WT band; ②PCR reaction obtains a single WT band.

Heterozygote: ①PCR reaction obtains a WT band and a Targeted band; ②PCR reaction obtains a WT band and a Targeted band.

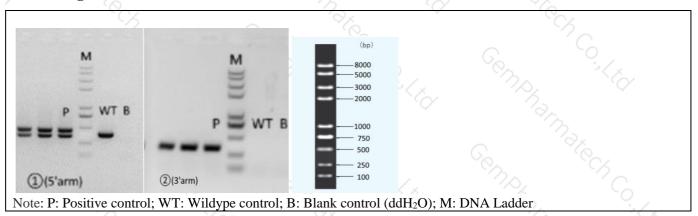

Homozygote: ①PCR reaction obtains a single Targeted band; ②PCR reaction obtains a single Targeted band.

Note: The sizes of WT and Targeted band are shown below.

#### 2. Primer Information

| 1 10     |                                   |                             | 7/1                       |  |
|----------|-----------------------------------|-----------------------------|---------------------------|--|
| PCR No.  | Primer No.                        | Sequence                    | Band Size                 |  |
| ①(5'arm) | T040337-F1                        | CTGCAAGGGAATAAGTCCATAAAGTGC | WT: 301bp                 |  |
|          | T040337-R1 GTACTGGTGTTATGCCTCCATC |                             | Targeted:406bp            |  |
| ②(3'arm) | T040337-F2                        | CATCGCATTGTCTGAGTAGGTG      |                           |  |
|          | T040337-R2                        | AAAGAAAGGAGGGAGTAAGGCCA     | WT: 0bp<br>Targeted:320bp |  |

## 3. Gel Image & Conclusion

- ① Control (WT): It is an important reference mark for whether the PCR reaction is successful and whether the product band position and size meet the theoretical requirements.
- ② Control (B): PCR amplification was performed without template in the PCR reagent to monitor whether the reagent was contaminated.

### 4. PCR Condition

| PCR Reaction Compo | nent                                |             | · /     |
|--------------------|-------------------------------------|-------------|---------|
| Seg.               | reaction comp                       | Volume (μl) |         |
| 1 7                | 2 × Rapid Taq Master Mix (Vazyme P2 | 12.5        |         |
| 2                  | ddH2O                               | 6           | 9.5     |
| 3                  | Primer A(10pmol/μl)                 |             | 19%     |
