# **Genotyping Report**

Strain ID	T020182	Strain Type	CKO(Cas9)	Genetic Background	C57BL/6JGpt
Designer	Ya'nan Xu	Gene Name	3/25	Rps4x	3

## 1. Strategy of Genotyping

Wild type: ①PCR reaction obtains a single WT band; ②PCR reaction obtains a single WT band.

Heterozygote: ①PCR reaction obtains a WT band and a Targeted band; ②PCR reaction obtains a WT band and a Targeted band.

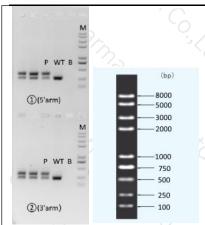

Homozygote: ①PCR reaction obtains a single Targeted band; ②PCR reaction obtains a single Targeted band.

Note: The sizes of WT and Targeted band are shown below.

## 2. Primer Information

PCR No.	Primer No.	Sequence	Band Size	
(7)	T020182-F1	82-F1 CCAGTGCCGGAGTTAGAGTTTATC		
①(5'arm)	T020182-R1 TAGGCCAAACCCAGTATTCGCAC		Targeted: 370bp	
	T020182-F2	GACACAAAGGAGCCTTAACTGCTTC	WT: 268bp Targeted: 374bp	
②(3'arm)	T020182-R2	ACCCCAGATAGGTCAATAACCAGAC		

## 3. Gel Image & Conclusion

Note: P: Heterozygous samples; WT: Wildtype control; B: Blank control (ddH2O); M: DNA Ladder

- ① Control (WT): It is an important reference mark for whether the PCR reaction is successful and whether the product band position and size meet the theoretical requirements.
- ② Control (B): PCR amplification was performed without template in the PCR reagent to monitor whether the reagent was contaminated.

## 4. PCR Condition

4. I CK CUI	iution	<u> </u>		
PCR Reaction	Component	970	7/2	
Seg.	rea	reaction component		
1	2 × Rapid Taq Master Mix	(Vazyme P222)	12.5	
2	ddH2O	The state of the s	9.5	0
3	Primer A(10pmol/μl)		1 7	
4 😞	Primer B(10pmol/μl)	7)	1 6
