

## Genotyping Report

|           |              |             |           |                    |               |
|-----------|--------------|-------------|-----------|--------------------|---------------|
| Strain ID | T062191      | Strain Type | CKO(Cas9) | Genetic Background | C57BL/6JGpt   |
| Designer  | Tiantian Sun | Gene Name   |           |                    | <i>Mcoln3</i> |

### 1. Strategy of Genotyping

Wild type: ①PCR reaction obtains a single WT band; ②PCR reaction obtains a single WT band.

Heterozygote: ①PCR reaction obtains a WT band and a Targeted band; ②PCR reaction obtains a WT band and a Targeted band.

Homozygote: ①PCR reaction obtains a single Targeted band; ②PCR reaction obtains a single Targeted band.

Note: The sizes of WT and Targeted band are shown below.

### 2. Primer Information

| PCR No.  | Primer No. | Primer Name    | Sequence                   | Band Size                    |
|----------|------------|----------------|----------------------------|------------------------------|
| ①(5'arm) | F1         | T062191(P1)-F1 | GATCCTGTACACACAAAGTGCCTG   | WT: 307bp<br>Targeted: 412bp |
|          | R1         | T062191(P1)-R1 | CAATCAGTAATTAAAGCCTCCAATCC |                              |
| ②(3'arm) | F2         | T062191(P1)-F2 | GGAAGAGGGGAATGAGGTCAAATT   | WT: 399bp<br>Targeted: 505bp |
|          | R2         | T062191(P1)-R2 | CTGTGTCAATCGTGAAGTCAGGATG  |                              |

### 3. Gel Image & Conclusion

- ① Control (WT) : It is an important reference mark for whether the PCR reaction is successful and whether the product band position and size meet the theoretical requirements.
- ② Control (B) : PCR amplification was performed without template in the PCR reagent to monitor whether the reagent was contaminated.

#### 4. PCR Condition

| PCR Reaction Component |  |             |  |
|------------------------|--|-------------|--|
| Seg.                   | reaction component                     | Volume (μl) |  |
| 1                      | 2 × Rapid Taq Master Mix (Vazyme P222) | 12.5        |  |
| 2                      | ddH2O                                  | 9.5         |  |
| 3                      | Primer A(10pmol/μl)                    | 1           |  |
| 4                      | Primer B(10pmol/μl)                    | 1           |  |
| 5                      | Template(20~80ng/μl)                   | 1           |  |

| PCR program I priority selection |                       |      |       |
|----------------------------------|-----------------------|------|-------|
| Seg.                             | Temp.                 | Time | Cycle |
| 1                                | 95°C                  | 5min |       |
| 2                                | 98°C                  | 30s  | 20×   |
| 3                                | 65°C * (-0.5°C/cycle) | 30s  |       |
| 4                                | 72°C                  | 45s* |       |
| 5                                | 98°C                  | 30s  | 15×   |
| 6                                | 55°C *                | 30s  |       |
| 7                                | 72°C                  | 45s* |       |
| 8                                | 72°C                  | 5min |       |
| 9                                | 10°C                  | hold |       |

| PCR program II the second choice |        |      |       |
|----------------------------------|--------|------|-------|
| Seg.                             | Temp.  | Time | Cycle |
| 1                                | 95°C   | 5min |       |
| 2                                | 98°C   | 30s  | 35×   |
| 3                                | 58°C * | 30s  |       |
| 4                                | 72°C   | 45s* |       |
| 5                                | 72°C   | 5min |       |
| 6                                | 10°C   | hold |       |

Note\*: Annealing temperature and extension time can be determined according to the actual amplification situation and amplification enzyme efficiency.
