

## Genotyping Report

|           |             |             |               |                    |             |
|-----------|-------------|-------------|---------------|--------------------|-------------|
| Strain ID | T005986     | Strain Type | KO(Cas9)      | Genetic Background | C57BL/6JGpt |
| Designer  | Binjie Jiao | Gene Name   | <i>Il15ra</i> |                    |             |

### 1. Strategy of Genotyping

Wild type: ①PCR reaction obtains a single WT band; ②PCR reaction obtains a single WT band.  
Heterozygote: ①PCR reaction obtains a WT band and a KO band; ②PCR reaction obtains a WT band.  
Homozygote: ①PCR reaction obtains a single KO band; ② PCR reaction without product.  
Note: 1)The sizes of WT and Targeted band are shown below.  
2) If the WT band is too large, it may not be possible to obtain a WT band.

### 2. Primer Information

| PCR No. | Primer No. | Primer Name     | Sequence                     | Band Size                |
|---------|------------|-----------------|------------------------------|--------------------------|
| PCR①    | F1         | T005986(P2)-F1A | CAGTCATTTCTGACTCTAGATTCCAAG  | WT: 15234bp<br>KO: 938bp |
|         | R1         | T005986(P2)-R1A | CTGGGGCTTACAGTATTTGTATCAAATG |                          |
| PCR②    | F2         | T005986(P2)-F2  | GAAACCTGTGCGCTCTATCCTG       | WT: 302bp<br>KO: 0bp     |
|         | R2         | T005986(P2)-R2  | GAACAAACTTCTCCGCTGGG         |                          |

### 3. Gel Image

taccacacagaattctccattgaagccag---14296bp---ttgcaggagtgactattagcattcttgaa

Note: P: Heterozygous samples; WT: Wildtype control; B: Blank control (ddH<sub>2</sub>O); M: DNA Ladder  
① Control (WT) : It is an important reference mark for whether the PCR reaction is successful and whether the

product band position and size meet the theoretical requirements.

② Control (B) : PCR amplification was performed without template in the PCR reagent to monitor whether the reagent was contaminated.

#### 4. PCR Condition

(Generally recommend to use Vazyme P222; If the sequences contain special structures such as GC%  $\geq$  60% or GC%  $\leq$  40%, recommend to use Vazyme P515.)

| PCR Reaction Component             |                                                                                        |      |             |
|------------------------------------|----------------------------------------------------------------------------------------|------|-------------|
| Seg.                               | reaction component                                                                     |      | Volume (μl) |
| 1                                  | 2 × Rapid Taq Master Mix(Vazyme P222)<br>or<br>2 × Phanta Max Master Mix (Vazyme P515) |      | 12.5        |
| 2                                  | ddH2O                                                                                  |      | 9.5         |
| 3                                  | Primer A(10pmol/μl)                                                                    |      | 1           |
| 4                                  | Primer B(10pmol/μl)                                                                    |      | 1           |
